**Reproductive Biology of Teleost Fishes** Robert J. Wootton, Carl Smith, 2014-12-03 *Reproductive Biology of Teleost Fishes* is the first integrated review of the reproductive biology of the bony fishes which are the most species rich and diversified group of vertebrates Teleosts display remarkable variation in their modes of reproduction and this volume is intended to provide a framework for understanding the remarkable reproductive diversity of this group It describes their reproductive biology using wherever possible phylogenetic analyses and life history theory as a means to interpret the information The book addresses the genetic physiological behavioural ecological evolutionary and applied aspects of teleost

reproduction in a comparative framework that emphasises the adaptive basis of reproductive diversity *Reproductive Biology of Teleost Fishes* provides a comprehensive synthesis of fish reproduction that will be of great interest to life scientists particularly ecologists evolutionary biologists physiologists and advanced undergraduates postgraduates and research workers requiring a comprehensive overview of fish reproduction The book is suitable for courses in fish biology and ecology reproductive physiology and reproductive genetics It also addresses applied questions and will be of value for courses on fisheries science and aquaculture Libraries in all universities and research establishments where biological sciences fisheries science and aquaculture are studied and taught should have several copies of this important book on their shelves

Hormones, Brain and Behavior ,2016-11-09 *Hormones Brain and Behavior* Third Edition offers a state of the art overview of hormonally mediated behaviors including an extensive discussion of the effects of hormones on insects fish amphibians birds rodents and humans Entries have been carefully designed to provide a valuable source of information for students and researchers in neuroendocrinology and those working in related areas such as biology psychology psychiatry and neurology This third edition has been substantially restructured to include both foundational information and recent developments in the field Continuing the emphasis on interdisciplinary research and practical applications the book includes articles aligned in five main subject sections with new chapters included on genetic and genomic techniques and clinical investigations This reference provides unique treatment of all major vertebrate and invertebrate model systems with excellent opportunities for relating behavior to molecular genetics The topics cover an unusual breadth from molecules to ecophysiology ranging from basic science to clinical research making this reference of interest to a broad range of scientists in a variety of fields Comprehensive and updated coverage of a rapidly growing field of research Unique treatment of all major vertebrate and invertebrate model systems with excellent opportunities for relating behavior to molecular genetics Covers an unusual breadth of topics and subject fields ranging from molecules to ecophysiology and from basic science to clinical research Ideal resource for interdisciplinary learning and understanding in the fields of hormones and behavior

**Neural Control of Reproduction** Kei-ichiro Maeda,Hiroko Tsukamura,Akira Yokoyama,1997 Reproductive processes in mammals consist of a series of physiological events spermatogenesis follicular growth ovulation progestational stage gestation parturition and postpartum nurturing including lactation In order for offspring to be reproduced effectively these processes must proceed in the proper chronological order In this regard the brain pituitary gland and gonads make up a dynamic axis in which the brain holds first place Reproductive behaviors corresponding to each physiological event such as copulatory and maternal behaviors must be synchronously expressed for successful reproduction These behaviors are considered to be the expression of higher brain function but the expression is strictly regulated by various components of the axis By focusing on neural activities this book improves understanding of the physiological processes and behaviors involved in reproduction

Reproduction in Domestic Ruminants III R. J. Scaramuzzi,C. D. Nancarrow,C. Doberska,1995 This volume contains the
