*Broadcast Programming* Susan Tyler Eastman, 1981      *Broadcast Programming, Strategies for Winning Television and Radio Audiences* Susan Tyler Eastman, Sydney W. Head, Lewis Klein, 1981      **Desperately Seeking the Audience** Ien Ang, 2006-06-28 Millions of people all over the world are avid members of the television audience Yet despite the central place television occupies in contemporary culture our understanding of its complex and dynamic role in everyday life remains surprisingly limited Focusing on the television audience Ien Ang asks why we understand so little about its nature and argues that our ignorance arises directly out of the biases inherent in prevailing official knowledge about it She sets out to deconstruct the assumptions of this official knowledge by exploring the territory where it is mainly produced the television institutions Ang draws on Foucault's theory of power knowledge to scrutinize television's desperate search for the audience and to identify differences and similarities in the approaches of American commercial television and European public service television to their audiences She looks carefully at recent developments in the field of ratings research in particular the controversial introduction of the people meter as an instrument for measuring the television audience By defining the limits and limitations of these institutional procedures of knowledge production Ien Ang opens up new avenues for understanding television audiences Her ethnographic perspective on the television audience gives new insights into our television culture with the audience seen not as an object to be controlled but as an active social subject engaging with television in a variety of cultural and creative ways      *The Mass Audience* James Webster, Patricia F. Phalen, 2013-11-05 In the early 20th century a new and distinctive concept of the audience rose to prominence The audience was seen as a mass a large collection of people mostly unknown to one another that was unified through exposure to media This construct offered a pragmatic way to map audiences that was relevant to industry government and social theorists In a relatively short period of time it became the dominant model for studying the audience Today it is so pervasive that most people simply take it for granted Recently media scholars have reopened inquiry into the meaning of audience They question the utility of the mass audience concept characterizing it as insensitive to differences among audience members inescapably bound up with discredited notions of mass society or serving only a narrow set of industrial interests The authors of this volume find that these assertions are often false and unwarranted either by the historical record or by contemporary industry practice Instead they argue for a rediscovery of the dominant model by summarizing and critiquing the very considerable body of literature on audience behavior and by demonstrating different ways of analyzing mass audiences Further they provide a framework for understanding the future of the audience in the new media environment and suggest how the concept of mass audience can illuminate research on media effects cultural studies and media policy      [The Museum of Broadcast Communications Encyclopedia of Radio](#) Museum of Broadcast Communications, 2004 A premise of this unique encyclopedia is that radio broadcasting is so pervasive that its importance can be easily overlooked More than 600 articles provide ample illustration of

the role this medium plays throughout the world From radio s invention to radio on the Internet the cross referenced and thoroughly indexed articles analyze over 100 years of topics programs issues people and places and provide leads to further reading Some 250 photographs give visual context to an often unseen world Scholars old time radio admirers and curious readers will appreciate the unparalleled comprehensiveness of this source The Top 20 Reference Titles of the Year American Libraries May 2004
