Regulating Investor Protection under EU Law Antonio Marcacci,2018-06-27 This book analyzes the legal system for the protection of retail investors under the European Union law of investment services It identifies the regulatory leitmotiv driving the EU lawmaker and ascertains whether and to what extent such a system is self sufficient using a set of EU made and EU enforced rules that is essentially different and autonomous from the domestic legal orders In this regard the book takes a double perspective comparative and intra firm Given the federal dimension of the US legal system and thus the role model it plays vis vis the EU the book compares the two systems To fully highlight the existing gaps and measure how self sufficient the EU system is against its American counterpart the Union Federal level as such is analyzed i e detached from the national in EU terms and State in US terms level

Regulating Investor Protection under EU Law also showcases the unique intra firm perspective from a European investment firm and analyzes how EU produced public law rules become a set of compliance requirements for investment services providers This within the firm angle gauges the self sufficiency of the EU system of retail investor protection from the standpoint of an EU regulated entity The book is intended for both compliance professionals and academic scholars interested in this topic while also including illustrative sections intended to provide a broader regulatory view for less experienced readers

Transnational Securities Regulation Antonio Marcacci,2022-11-25 The book provides an analysis of the emergence evolution and transformation of transnational securities regulation and of the influences from and the interactions between global regulatory powers in the field Combining insights from law and political science the work

employs a two tier complementary on the books and in action approach The more classical on the books approach draws on scholarship in United States and European Union securities regulation transnational regulation and global administrative law regime complexity global governance studies and the regulatory production of the International Organisation of Securities Commissions IOSCO The law in action approach leverages the author s experience as Compliance senior professional in a multinational financial institution as well as research interviews with senior IOSCO staff The author s findings enable the reader to develop an original understanding of IOSCO its standards and its unique place in the transnational regulatory arena They also challenge the doxa that the US are the only driving regulatory power in the securities area when in fact other regulatory powers are emerging for the time being the EU The balance has shifted and regulatory compromises are achieved at different points in the rule making process
