Research for Architecture Avigail Sachs,2009 **Imagining Modernity** Anoma Pieris,Social Scientists Association of Sri Lanka,2007 This book is a detailed study of the architecture of Valentine Gunasekara 1931 2017 It provides an innovative lens to understand the formation of a Ceylonese middle class which was inspired by the post independence desire for modernity Their experiments values and dynamic social history are the framework for this research Although neglected by his peers and marginalized by the prevalent discourse on vernacular regionalism Gunasekara s work poses important questions regarding the utopian ideals of

the modernist project and its successes and its failures in Asia More significantly his work reveals the European and American influences that shaped the first generation of Ceylonese architects and their efforts at adapting new materials and technologies to a very different climate and culture This book documents a wide range of Gunasekara s projects including residential religious and commercial buildings arguing that they represented a nascent cosmopolitanism from below that proved to be quite antithetical to regionalist trends in architecture This e book is a re publication of an earlier edition published by Stamford Lake in 2007

Critical Regionalism Liane Lefavre,Alexander Tzonis,2003 This richly illustrated and designed book in the Architecture in Focus series reconsiders critical regionalism and demonstrates the global viability of one of the most visible trends in contemporary architecture As globalization increasingly enters every facet of our lives its homogenizing effects on architecture urban spaces and the landscape have compelled architects to embrace the principles of critical regionalism an alternative theory that respects local culture geography and climate In this reexamination of critical regionalism two prominent architectural critics argue for a truce between the seemingly antithetical philosophies of critical regionalism and globalization The authors trace the genesis of critical regionalism to its ancient historical and political roots and focus on its modern expression in the works of Alvar Aalto Richard Neutra Oscar Niemeyer and others They point to the increasing use of the theory in the recent works of a truly global selection of visionary architects including Santiago Calatrava in Spain Renzo Piano in the South Pacific and Berger and Parkkinen in Germany Discussions of Tropical Architecture and contemporary work in Asia round out this important contribution to a topical debate about architecture s role in the world Amazon *Art Nexus* ,2006
