**Historical Archaeology of Childhood and Parenting** April Kamp-Whittaker, Jamie J. Devine, Suzanne M. Spencer-Wood, 2024-04-12 The study of childhood in historical archaeology enriches interpretations of the past but also has the potential for contributing to the understanding of methodological and theoretical issues in archaeology Archaeologically children are understudied relative to both their demographic and social importance partly because children are viewed as difficult to discern in the archaeological record Historical archaeology with its access to historical documents to supplement and illuminate archaeological evidence provides an opportunity to gain a greater understanding of the ways children s daily lives in the past were expressed in historically changing types and patterns of material culture Recent research presented in this volume contributes valuable perspectives for conceptualizing the historically changing social nature of childhood and methods for illuminating the roles of children Case studies are designed to illustrate methodological and theoretical advances in the historical archaeology of materialized experiences discourses identities places and their meanings associated with parenting and childhood The volume is organized into three sections devoted to case studies about 1 how childhood and parenting have been socially constructed cross culturally and temporally 2 social ideologies of childhood in contested spaces and 3 the relationship between children s experiences and adult expectations of childhood Each chapter demonstrates advances in current methods or theories used in the archaeology of childhood A final discussant drawn from the broader field of research on the archaeology of childhood provides a commentary on the ways the perspectives provided in the volume can be employed by researchers outside the sub discipline of historical archaeology

[International Handbook of Historical Archaeology](#) Teresita Majewski, David Gaimster, 2009-06-07 In studying the past archaeologists have focused on the material remains of our ancestors Prehistorians generally have only artifacts to study and rely on the diverse

material record for their understanding of past societies and their behavior Those involved in studying historically documented cultures not only have extensive material remains but also contemporary texts images and a range of investigative technologies to enable them to build a broader and more reflexive picture of how past societies communities and individuals operated and behaved Increasingly historical archaeology refers not to a particular period place or a method but rather an approach that interrogates the tensions between artifacts and texts irrespective of context In short historical archaeology provides direct evidence for how humans have shaped the world we live in today Historical archaeology is a branch of global archaeology that has grown in the last 40 years from its North American base into an increasingly global community of archaeologists each studying their area of the world in a historical context Where historical archaeology started as part of the study of the post Columbian societies of the United States and Canada it has now expanded to interface with the post medieval archaeologies of Europe and the diverse post imperial experiences of Africa Latin America and Australasia The 36 essays in the International Handbook of Historical Archaeology have been specially commissioned from the leading researchers in their fields creating a wide ranging digest of the increasingly global field of historical archaeology The volume is divided into two sections the first reviewing the key themes issues and approaches of historical archaeology today and the second containing a series of case studies charting the development and current state of historical archaeological practice around the world This key reference work captures the energy and diversity of this global discipline today

**Southeastern Archaeology** ,1996 **Archaeological Thinking** Charles E. Orser,2015 How do archaeologists think How do they use the scattered and often fragmentary remains from the past both historical and excavated to create meaningful sensible interpretations of human history In *Archaeological Thinking* Charles E Orser Jr provides a commonsense guide to applying critical thinking skills to archaeological questions and evidence Rather than critiquing and debunking specific cases of pseudo archaeology or concentrating on archaeological theory Orser considers the basics of scientific thinking the use of logic and analogy the meaning and context of facts and the evaluation of source materials He explains concisely and accessibly how archaeologists use these principles to create pictures of the past and teaches students to develop the skills needed to make equally reasoned interpretations
