Audacious Reforms: Institutional Invention and Democracy in Latin America

Audacious Reforms:

Audacious Reforms Merilee S. Grindle, 2003-05-27 *Audacious Reforms* examines the creation of new political institutions in three Latin American countries: direct elections for governors and mayors in Venezuela, radical municipalization in Bolivia, and direct election of the mayor of Buenos Aires in Argentina. Diverging from the usual incremental processes of political change, these cases marked a significant departure from traditional centralized governments. Such audacious reforms explain Merilee S. Grindle's reinvention of the ways in which public problems are manifested and resolved, the ways in which political actors calculate the costs and benefits of their activities, and the ways in which social groups relate to the political process. Grindle considers three central questions: Why would rational politicians choose to give up power? What accounts for the selection of some institutions rather than others? And how does the introduction of new institutions alter the nature of political actions? The case studies of Venezuela, Bolivia, and Argentina demonstrate that institutional invention must be understood from theoretical perspectives that stretch beyond immediate concerns about electoral gains and political support building. Broader theoretical perspectives on the definition of nation and state, the nature of political contests, the legitimacy of political systems, and the role of elites all must be considered. While past conflicts are not erased by reforms in the new order, there is often greater potential for more responsible, accountable, and democratic government.

Converging Social Justice Issues and Movements Tsegaye Moreda, Saturnino M. Borrás Jr., Alberto Alonso-Fradejas, Zoe W. Brent, 2020-05-21 *Converging Social Justice Issues and Movements* argues that multiple contemporary converging crises have significantly altered the context for and object of political contestations around agrarian, climate, environmental, and food justice issues. This shift affects alliances, collaboration, and conflict among and between state and social forces, as well as within and between social movements. The actual implications and mechanisms by which these changes are happening are to a large extent empirical questions that need careful investigation. The majority of the discussions in this volume are dedicated to the issue of responses to the crises, both by capitalist forces and those adversely affected by the crises, and the implications of these for academic research and political activist work. Interdisciplinary in nature, *Converging Social Justice Issues and Movements* will be of great use to scholars of agrarian politics, as well as climate and environmental justice studies. The chapters were originally published as a special issue in *Third World Quarterly*.

From Patriarchy to Empowerment Valentine Moghadam, 2007-06-18 This rich anthology offers twenty studies on instances of emerging social justice and women's empowerment in the Middle East, North Africa, and South Asia. These areas are home to huge populations where women's rights have withered under patriarchal rule, and many are beset by civic unrest. The book shows how changes are occurring as flood tides of capital, people, and information erode entrenched gender regimes, giving birth to energetic and forward-thinking women's movements. Highly original, conceptually sophisticated, and imminently readable, this book illustrates how local women are transforming their collective fates by

questioning their status forming alliances demanding full participation in economic development and the political process and mining opportunities afforded by globalization

The Public Wealth of Cities Dag Detter, Stefan Folster, 2017-07-18
How to leverage existing resources to meet the current and future needs of cities Crumbling streets and bridges Poorly performing schools and inadequate social services These are common complaints in cities which too often struggle just to keep the lights on much less make the long term investments necessary for future generations It doesn't have to be this way This book by two internationally recognized experts in public finance describes a new way of restoring economic vitality and financial stability to cities using steps that already have been proven remarkably successful The key is unlocking social human and economic wealth that cities already own but is out of sight or hidden A focus on existing public wealth helps to shift attention and resources from short term spending to longer term investments that can vastly raise the quality of life for many generations of urban residents A crucial first step is to understand a city's balance sheet too few cities comprehend how valuable a working tool this can be With this in hand taxpayers politicians and investors can better recognize the long term consequences of political decisions and make choices that mobilize real returns rather than rely on more taxes debt or austerity Another hidden asset is real estate Even poor cities own large swathes of poorly utilized land or they control underperforming utilities and other commercial assets Most cities could more than double their investments with smarter use of these commercial assets Managing the city's assets smartly through the authors proposed Urban Wealth Funds at arm's length from short term political influence will enable cities to ramp up much needed infrastructure investments
