Sigelman, David Reed Shaffer, 1991 This life span development text known for its clear authoritative writing style and its solid research orientation offers a topical organization at the chapter level and a consistent chronological presentation within each chapter Each chapter focuses on a domain of development such as physical growth cognition or personality and traces developmental trends and influences in that domain from infancy to old age Within each developmental chapter you will find sections on four life stages Infancy Childhood Adolescence and Adulthood This unique organization enables students to comprehend the processes of transformation that occur within the many areas of human development New co author Elizabeth Rider brings to this edition her expertise in cognitive development and gender issues Additional enhancements include a stronger emphasis on biological and cultural influences a new four color design and an improved pedagogical plan

Language, Memory, and Cognition in Infancy and Early Childhood Janette B. Benson, Marshall M. Haith, 2010-05-22

Language cognition and memory are traditionally studied together prior to a researcher specializing in any one area They are studied together initially because much of the development of one can affect the development of the others Most books available now either tend to be extremely broad in the areas of all infant development including physical and social development or specialize in cognitive development language acquisition or memory Rarely do you find all three together despite the fact that they all relate to each other This volume consists of focused articles from the authoritative Encyclopedia of Infant and Early Childhood Development and specifically targets the ages 0 3 Providing summary overviews of basic and cutting edge research coverage includes attention assessment bilingualism categorization skills critical periods learning disabilities reasoning speech development etc This collection of articles provides an essential affordable reference for researchers graduate students and clinicians interested in cognitive development language development and memory as well

as those developmental psychologists interested in all aspects of development Focused content on age 0 3 saves time searching for and wading through lit on full age range for developmentally relevant info Concise understandable and authoritative easier to comprehend for immediate applicability in research Readings in the Psychology of Childhood and Adolescence William J.
