Database Applications Using Prolog Robert Lucas, 1988 Database Application Engineering with DAIDA Matthias Jarke, 2014-01-13 In the early 1980s a trend towards formal understanding and knowledge based assistance for the development and maintenance of database intensive information systems became apparent The group of John Mylopoulos at the University of Toronto and their European collaborators moved from semantic models of information systems design Taxits project towards earlier stages of the software lifecycle Joachim Schmidt's group at the University of Hamburg completed their early work on the design and implementation of database programming languages Pascal R and began to consider tools for the development of large database program packages The Belgian company BIM developed a fast commercial Prolog which turned out to be useful as an implementation language for object oriented knowledge representation schemes and as a prototyping tool for formal design models Case studies by Vasant Dhar and Matthias Jarke in New York pointed out the need for formally representing process knowledge and a number of projects in the US and Europe began to consider computer assistance CASE as a viable approach to support software engineering In 1985 the time appeared ripe for an attempt at integrating these experiences in a comprehensive CASE framework relating all phases of an information systems lifecycle The Commission of the European Communities decided in early 1986 to fund this joint effort by six European software houses and research institutions in the Software Technology section of the ESPRIT I program The project was given the number 892 and the title DAIDA Development Assistance for Intelligent Database Applications Database and Expert Systems Applications Djamel Benslimane, Ernesto Damiani, William I. Grosky, Abdelkader Hameurlain, Amit Sheth, Roland R. Wagner, 2017-08-11 This two volume set LNCS 10438 and LNCS 10439 constitutes the refereed proceedings of the 28th International Conference on Database and Expert Systems Applications DEXA 2017 held in Lyon France August 2017 The 37 revised full papers presented together with 40 short papers were carefully reviewed and selected from 166 submissions The papers discuss a range of topics including Semantic Web and Semantics Graph Matching Data Modeling Data Abstraction and Uncertainty Preferences and Query Optimization Data Integration and RDF Matching Security and Privacy Web Search Data Clustering Top K and Skyline Queries Data Mining and Big Data Service Computing Continuous and Temporal Data and Continuous Query Language Text Processing and Semantic Search Indexing and Concurrency Control Methods Data Warehouse and Data Stream Warehouse Data Mining and Machine Learning Recommender Systems and Query Recommendation Graph Algorithms Semantic Clustering and Data Classification **Advances in Databases** Michael F. Worboys, Anna F. Grundy, 1993-06-23 This volume contains the proceedings of the eleventh British National Conference on Databases held at Keele University England A dominant theme in the volume is the provision of the means to enhance the capabilities of databases to handle information that has a rich semantic structure A major research question is how to achieve such a semantic scale up without sacrificing performance There are currently two main paradigms within which it is

possible to propose answers to this question deduction oriented and object oriented Both paradigms are well represented in this collection with the balance in the direction of the deductive approach which is followed by both the invited papers by Michael Freeston from the European Computer Industry Research Centre in Munich and Carlo Zaniolo from the University of California at Los Angeles In addition the volume contains 13 full papers selected from a total of 36 submissions

Research and Development in Expert Systems V British Computer Society. Specialist Group on Expert Systems. Technical Conference, 1989-02-09 Contains papers presented at Expert Systems 88 the eighth annual conference of the British Computer Society Specialist Group on Expert Systems held in Brighton in December 1988 Covers many aspects of current work in particular theoretical topics practical techniques and real applications of expert systems a wide spectrum of commercial and industrial interest The theme of the 1988 conference was integrating with mainstream software development No index Annotation copyrighted by Book News Inc Portland OR

Advances in Database Technology - EDBT '90 Francois Bancilhon, Costantino Thanos, 1990-02-21 Database technology is currently being pushed by the needs of new applications and pulled by the opportunities of novel developments in hardware and systems architecture The invited paper two panel sessions and 27 papers in this volume report on how the technology is currently extending One broad area covered is extended database semantics including data models and data types databases and logic complex objects and expert system approaches to databases The other area covered is raw architectures and increased database systems support including novel transaction models data distribution and replication database administration and access efficiency
