Death Decision:

A Life and Death Decision Scott E. Sundby, 2015-03-17 A gripping exploration of a jury's members perspectives on the most wrenching decision the death sentence With a life in the balance a jury convicts a man of murder and now has to decide whether he should be put to death Twelve people now face a momentous choice Bringing drama to life A Life and Death Decision gives unique insight into how a jury deliberates We feel the passions anger and despair as the jurors grapple with legal moral and personal dilemmas The jurors voices are compelling From the idealist to the holdout the individual stories of how and why they voted for life or death drive the narrative The reader is right there siding with one or another juror in this riveting read From movies to novels to television juries fascinate Focusing on a single case Sundby sheds light on broader issues including the roles of race class and gender in the justice system With death penalty cases consistently in the news this is an important window on how real jurors deliberate about a pressing national issue Death by Decision Jerry B. Wilson, 1975 Surveys the attitudes toward and arguments for and against euthanasia and examines the key medical legal and moral issues involved offering a guideline for medical and legal actions in cases involving hopeless suffering **Suicide: a Permanent Decision to a Passing Problem** Joseluis Canales, 2013-09-03 Actually suicidal persons don't want to die they just want to stop living the way they have been up to now People who suffer intensely and think about taking their life are experiencing a severe depression and high degree of hopelessness and confusion which darken and limit their vision of life It is a perspective that only allows them to see death as the solution to heal the suffering their existence has become Joseluis Canales Dado reveals in this book that suicide is not the only solution to pain The text provides a searing reflection on this tragic subject while offering perspectives to overcome it This expert on psychotrauma delicately unpacks the intricacies of the act so that those with a suicidal risk can begin to heal their pain and see the life options before them options which right now seem unassailable Dado accomplishes through intelligent and thought provoking arguments an intimacy with readers who may be dealing with this life crisis to help them find an escape from the haziness and confusion enveloping them My dream my hope behind all this work is that this book falls into the hands of someone that's considering suicide as the only way out from the hell they are suffering This person may be you and perhaps by reading this book you can overcome the existential crisis you are living through and your life can go on My fantasy is that someone at suicidal risk unable to imagine that this suffering can be left behind decides to seek help Maybe just maybe this book can save one life That life may be yours and because of that and nothing else it will have been worth it to write this book Dado *Decision Science and Technology* James Shanteau, Barbara A. Mellers, David A. Schum, 2012-12-06 Decision Science and Technology is a compilation of chapters written in honor of a remarkable man Ward Edwards Among Ward's many contributions are two significant accomplishments either of which would have been enough for a very distinguished career First Ward is the founder of behavioral decision theory This interdisciplinary discipline addresses the question of how people actually confront decisions

as opposed to the question of how they should make decisions Second Ward laid the groundwork for sound normative systems by noticing which tasks humans can do well and which tasks computers should perform This volume organized into five parts reflects those accomplishments and more The book is divided into four sections Behavioral Decision Theory examines theoretical descriptions and empirical findings about human decision making Decision Analysis examines topics in decision analysis Decision in Society explores issues in societal decision making The final section Historical Notes provides some historical perspectives on the development of the decision theory Within these sections major multi disciplinary scholars in decision theory have written chapters exploring some very bold themes in the field as an examination of the book s contents will show The main reason for the health of the Decision Analysis field is its close links between theory and applications that have characterized it over the years In this volume the chapters by Barron and Barrett Fishburn Fryback Keeney Moreno Pericchi and Kadane Howard Phillips Slovic and Gregory Winkler and above all von Winterfeldt focus on those links Decision science originally developed out of concern with real decision problems and applied work such as is represented in this volume will help the field to remain strong

Children, Families, and Health Care Decision Making Lainie Friedman Ross, 1998

ISSUES IN BIOMEDICAL ETHICS General Editors John Harris University of Manchester S ren Holm University of Copenhagen Consulting Editor Ranaan Gillon Director Imperial College Health Service London North American Consulting Editor Bonnie Steinbock Professor of Philosophy SUNY Albany

The late twentieth century has witnessed dramatic technological developments in biomedical science and the delivery of health care and these developments have brought with them important social changes All too often ethical analysis has lagged behind these changes The purpose of this series is to provide lively up to date and authoritative studies for the increasingly large and diverse readership concerned with issues in biomedical ethics not just health care trainees and professionals but also social scientists philosophers lawyers social workers and legislators The series will feature both single author and multi author books short and accessible enough to be widely read each of them focused on an issue of outstanding current importance and interest Philosophers doctors and lawyers from several countries already feature among the contributors to the series It promises to become the leading channel for the best original work in this burgeoning field this book Lainie Friedman Ross presents an original and controversial examination of the moral principles that guide parents in making health care decisions for their children and the role of children in the decision making process She opposes the current movement to increase child autonomy in favour of respect for family autonomy She argues that children should be included in the decision making process but that parents should be responsible for their children s health care even after the children have achieved some threshold level of competency The first half of the book presents and defends a model of decision making for children s health care the second half shows how it works in various practical contexts considering children as research subjects and as patients organ donorship and issues relating to

adolescent sexuality Implementation of Ross s model would result in significant changes in what informed consent allows and requires for paediatric health care decisions This is the first systematic medical ethics book that focuses specifically on children s health care It has important things to say to health care providers who work with children as well as to ethicists and public policy analysts
