Daniells, 1993 This is the reference work that librarians and business people have been waiting for Lorna Daniells's updated guide to selected business books and reference sources Completely revised with the best most recent information available this edition contains several new sections covering such topics as competitive intelligence economic and financial measures and health care marketing Handbooks bibliographies indexes and abstracts online databases dictionaries directories statistical sources and periodicals are also included Speedy access to up to date information is essential in the competitive computerized business world This classic guide will be indispensable to anyone doing business research today *The Impact of Japanese Investment on the New Town of Milton Keynes* Alexander Roy, 1998-06 Foreign direct investment FDI is pivotal to the UK economy with the UK being both the second largest investor abroad and the second largest host to foreign companies Although since the Second World War FDI has been dominated by the USA the more recent rise of Japan as both an international force in global markets and as an investor has seen increasing amounts of Japanese FDI being directed

towards the UK Further the perceived innovativeness of Japanese work organisation is held by many to have an even greater qualitative impact than the quantitative significance of Japanese FDI would indicate providing both a demonstration effect and a competitive spur to indigenous companies that it is believed has the power to transform the UK s competitiveness However many aspects of the Japanese challenge have become mythologised and it is important not to simply take these claims as axiomatic especially as Government policy including financial inducements to inward investors are based upon these assumptions Therefore this dissertation uses primary and secondary research to assess the impact Japanese investment has had upon the new town of Milton Keynes MK which is the home to a significant cluster of Japanese investors with a composition that broadly reflects FDI into the UK from Japan as a whole The conclusion is that although there have been benefits in terms of employment any positive transformative effect upon either indigenous industry or human capital has been limited Further the structural weakness in skills of the UK economy mean that Japanese investment may impose longer term costs upon UK welfare
