"Aristotle: He argued for the existence of a divine being, described as the Prime Mover, who is responsible for the unity and purposefulness of nature. God is perfect and therefore the aspiration of all things in the world, because all things desire to share perfection. Other movers exist as well—the intelligent movers of the planets and stars (Aristotle suggested that the number of these is either 55 or 47).

The Prime Mover, or God, described by Aristotle is not very suitable for religious purposes, as many later philosophers and theologians have observed.

Aristotle limited his "theology," however, to what he believed science requires and can establish. " Source: Brumbaugh, Robert S. "Aristotle. " Microsoft Encarta 206 (DVD). Redmond, WA: Microsoft Corporation, 2005 This falls under problem number one," What is the ultimate nature of reality, existence or being. " It is not the perfect one for me. Because it just recognizes that there is a God, who is the Prime Mover. Everything starts from him, the ultimate nature of reality, and existence. But it does not answer the relationship of God with Man or to each and everyone of us.

Other Movers are also recognized, and it confuses the proposal, Aristotle mentions the existence of a divine being, and also other intelligent movers. It did not answer how they relate to each other, just a mere mentioning of their existence, may not be enough. Somehow, there must be a way in determining their existence and most especially to Man. It must be considered that the existence of Man has never reached a Harmonious level. But instead we are always in trouble, such as anger and hunger are everywhere. The Philosopher-Kings would exercise political power in the service of justice and wisdom; the soldiers would protect the state as a means of acquiring honor; and the civilian population would provide for the material needs of society. A large part of The Republic is devoted to a detailed presentation of the rigorous intellectual training of future rulers.

This section also contains a fundamental analysis of metaphysical and scientific thought. The government of the state acts to enforce the virtue, and consequently the true happiness, of the individual citizen, and an orderly and productive public life is the result. Criticizing the doctrines of atheism and materialism, Plato reaffirmed his idealistic position and asserted this belief in the moral government of the universe and the immortality of the soul.
