Philip Garrison

Basic Structures 2:

Basic Structures Philip Garrison, 2016-02-03 *Basic Structures* provides the student with a clear explanation of structural concepts using many analogies and examples. Real examples and case studies show the concepts in use and the book is well illustrated with full colour photographs and many line illustrations giving the student a thorough grounding in the fundamentals and a feel for the way buildings behave structurally. With many worked examples and tutorial questions the book serves as an ideal introduction to the subject.

Freedom and Equality Clare Chambers, 2024-03-13 Should the state recognise gender? Can a liberal state discourage traditional family structures? Is women's sport compatible with equality of opportunity? Should feminists defend women's freedom to choose cosmetic surgery? Is genital cutting always wrong or is it only wrong for girls? *Freedom and Equality* investigates the contours of feminist liberalism, a philosophical approach that is appealing but elusive. Its hallmark is a liberalism that prioritises equality and individual autonomy while offering a rigorous critique of using individuals' choices as the measure of justice. Liberalism without feminism prioritises individual choice, a strategy that has played a crucial role in the liberal defence of freedom against authoritarianism and conformity. However, as feminism shows, relying on individual choice is insufficient to render an outcome just because people often choose things that harm or disadvantage themselves. From beauty norms to the gendered division of labour, from marriage to religion, women and men choose to arrange their lives in ways that perpetuate inequality. Often these choices are made in response to social norms, including unjust, unequal or harmful norms. It follows that relying on individual choice as a measure of justice actually leaves unjust social structures intact. Any defender of autonomy and equality must be prepared to criticise individuals' choices while prioritising individual choosers. The essays in this collection cover a wide range of issues fundamental to liberalism, to feminism, and to their intersection. They explore the foundational philosophical concepts of choice, equality of opportunity, ideology, and the state, and they engage directly with key political controversies, including women's sport, the state recognition of gender, the regulation of cosmetic and cultural surgeries, and state action to secure equality in the family. Clare Chambers argues that feminist liberalism is both possible and necessary. It is possible because the two doctrines of feminism and liberalism are compatible: their fundamental values of freedom and equality are aligned. But feminism is necessary because liberalism has shown that it is simply not up to the task of securing gender equality and women's liberation alone.
