Jacob Baechtold, Gottfried Keller, 1897      **Cultural Understanding of Soils** Nikola Patzel, Sabine Grunwald, Eric C.  
Brevik, Christian Feller, 2023-09-22 Cultural understandings of soil are diverse and often ambiguous Cultural framing of soils  
is common worldwide and is highly consequential The implications of what place the earth has in people s world view and  
everyday life can be in line with or in conflict with natural conditions with scientific views or with agricultural practices The  
main assumption underlying this work is that soil is inescapably perceived in a cultural context by any human This gives  
emergence to different significant webs of meaning influenced by religious spiritual or secular myths and by a wide range of  
beliefs values and ideas that people hold in all societies These patterns and their dynamics inform the human soil relationship  
and how soils are cared for protected or degraded Therefore there is need to deal inter culturally with different sources and  
types of knowledge and experience regarding soil a need to cultivate soil awareness and situationally appropriate care  
through inter and intra cultural dialogues and learning This project focuses on the human and intangible dimensions of soil  
To serve this aim the International Union of Soil Sciences IUSS founded a working group on Cultural Patterns of Soil  
Understanding that has resulted in this book which presents studies from almost all continents written by soil scientists and  
experts from other disciplines A major objective of this project is to promote intercultural literacy that gives readers the  
opportunity to appreciate soil across disciplinary and cultural boundaries in an increasingly globalized world      **Briefe an**
