## **British Building Styles Recognition:**

**British Building Styles Recognition** Alan Hollingsworth, 1987      Ontario House Styles Robert Mikel, 2004-10

Stunning full colour photographs and engaging text show readers how to identify Ontario's many unique types of homes. Ontario has a rich history of architectural styles and is home to some of the most stunning heritage houses in North America. In this book author Robert Mikel profiles in depth every important house style the province has seen over the past three centuries from the grand elegance of the Italianate to the intimacy and coziness of the Ontario Cottage. Readers will see how each house style developed in Europe came to Ontario and the variations that are unique to the province. Both an attractive gift book and a solid reference, *Ontario House Styles* will appeal to those who live in Ontario's tens of thousands of heritage homes and to anyone interested in Ontario's colourful architectural history. *Ontario House Styles* includes ninety homes from Ancaster, Brockville, Cobourg, Cambridge, Dundas, Gananoque, Grafton, Grimsby, Hamilton, Kingston, London, Napanee, Niagara on the Lake, Odessa, Paris, Picton, Port Hope, St. Mary's, Stoney Creek, Stratford, Toronto, Waterloo.      Journal of the Royal Institute of British Architects Royal Institute of British Architects, 1929      **The British Architect**, 1875      *The Literature of British Domestic Architecture, 1715-1842* John Archer, 1985. While few historians would dispute the importance of the printed book in the development of domestic design in 18th and 19th century Britain, this is the first major study to trace the evolution of architectural ideas during the period by examining the literary output of architects. It is a work of extraordinary scholarship based on an extensive search of dozens of major library collections that will serve as a standard resource for researchers and librarians, book dealers and collectors. Most of the book is devoted to descriptions of hundreds of books and periodicals containing original designs for domestic structures. The earliest title described is Colen Campbell's *Vitruvius Britannicus* 1715, an important Palladian manifesto and the first book to illustrate a series of the author's own executed designs for dwellings intended to redirect and reform British architectural taste, and the latest title is *Supplement* 1842 to John Claudius Loudon's *Encyclopedia*. Related materials on agriculture, landscape design, drawing and perspective also are covered. Each entry includes a bibliographic description of all known editions and a commentary that describes and analyzes the text and plates, focusing in particular on the author's ideas and approaches to design issues. Appendixes to the principal entries provide a checklist of additional handbooks and manuals by important authors such as Crunden, Halfpenny, Langley, Nicholson, Pain, Richardson, Salmon and Swan, and books showing domestic interiors. There is also a valuable short title chronological list and a list of printers, publishers and booksellers. In a lengthy introductory essay, Archer discusses architecture and the book trade, the format and content of the books, and aspects of architectural theory and design, including ideas of character and retirement dwelling types such as villas, cottages and row houses, model housing for laborers and town and village planning. John Archer is Associate Professor in the Humanities Program at the University of Minnesota.      *The Pearson CSAT Manual 2012* Edgar Thorpe, 2012      Architecture, Building Materials and Engineering Management He Tao
