Justifying Strict Liability Marco Cappelletti, 2022 The imposition of strict liability in tort law is controversial and its theoretical foundations are the object of vigorous debate Why do or should we impose strict liability on employers for the torts committed by their employees or on a person for the harm caused by their children animals activities or things In responding to this type of questions legal actors rely on a wide variety of justifications Justifying Strict Liability explores in a comparative perspective the most significant arguments that are put forward to justify the imposition of strict liability in four legal systems two common law England and the United States and two civil law France and Italy These justifications include risk accident avoidance the deep pockets argument loss spreading victim protection reduction in administrative costs and individual responsibility By looking at how these arguments are used across the four legal systems this book considers a variety of patterns which characterise the reasoning on strict liability The book also assesses the justificatory weight of the arguments showing that these can assume varying significance in the four jurisdictions and that such variations reflect different views as to the values and goals which inspire strict liability and tort law more generally Overall the book seeks to improve our understanding of strict liability to shed light on the justifications for its imposition and to enhance our
