*Basic Histochemistry* Barbara E. H. Sumner, 1988-06 Teaches the basic principles and practices in animal histochemistry Beginning chapters cover basic definitions and principles including elementary methods for living tissue and fixed tissue Subsequent chapters are grouped by type of method rather than type of substance Provides enough theoretical background to unify the presentation *Histological and Histochemical Methods, fifth edition* John Kiernan, 2015-06-08 This fifth edition of *Histological and Histochemical Methods* continues to provide a clear and consistent introduction to the techniques description and analysis of the chemical and physical principles of fixation tissue processing staining enzyme location immunohistochemistry and other key procedures The overall structure of the book remains unchanged but the content has been heavily revised to update the techniques used in line with recent technological advances Additionally there are new sections on Artefacts and troubleshooting Methods for microorganisms and fungi in sections Methods for various pigments and mineral deposits in tissues Methods for skeletal elements bone cartilage in whole mounts *Histological and Histochemical Methods 5e* is essential reading for students lecturers researchers and professionals using histological and histochemical techniques From reviews *Histological and Histochemical Methods* is a tour de force wholly suited to the modern age of histology and Professor Kiernan has triumphed again To cover so much ground clearly and concisely while including the justification of the underlying chemistry makes this book unique There should not be a histology laboratory or an undergraduate library that does not own a copy *Biotechnic Histochemistry* 2016 91 2 145 This book should be present on the bookshelves of every research or analysis laboratory where histology and histochemistry are routinely used as an essential reference source of basic and practical information for scientists and technicians *European Journal of Histochemistry* 2016 vol 60 *Methods in Plant Electron Microscopy and Cytochemistry* William V.
