

## Lecture One

**Geotectonics:** Relating to the **form, arrangement, and structure** of rock masses of the earth crust resulting from folding or faulting.

The word **geotectonics** is derived from two Greek words **gê—earth, and tectonicon—to build**. It consequently means literally the science of the **Earth's structure**, but such a definition is too wide since it embraces, in essence, almost, the whole of geology.

**Tectonics** (from the Late Latin *tectonicus* from the Greek *τεκτονικός*, "pertaining to building") is concerned with the **processes which control the structure and properties** of the Earth's crust, and its evolution through time.
