Architectural Apocalypse:

A Critical History of Contemporary Architecture Dr Elie G Haddad, Asst Prof David Rifkind, Ms Sarah Deyong, 2014-03-28
This book provides a comprehensive critical overview of the developments in architecture from 1960 to 2010. The first section provides a presentation of major movements in architecture after 1960 and the second a geographic survey that covers a wide range of territories around the world. This book not only reflects the different perspectives of its various authors but also charts a middle course between the aesthetic histories that examine architecture solely in terms of its formal aspects and the more ideological histories that subject it to a critique that often skirts the discussion of its formal aspects.

The Grove Encyclopedia of Medieval Art and Architecture Colum Hourihane, 2012. This volume offers unparalleled coverage of all aspects of art and architecture from medieval Western Europe from the 6th century to the early 16th century. Drawing upon the expansive scholarship in the celebrated Grove Dictionary of Art and adding hundreds of new entries, it offers students, researchers, and the general public a reliable up-to-date and convenient resource covering this field of major importance in the development of Western history and international art and architecture.
