Reynolds Metals Company, John Peter

Architecture Without Shadow:

Architecture Without Shadow Gloria Moure, 2000 Architecture has always been a natural subject matter for photographers but for most of the twentieth century the practice of architectural photography has been a professional endeavor anonymous photographs taken for clients for specific commercial reasons This book concerns itself with another aspect of the phenomenon the photography of architecture as an art practice It considers the work of seven contemporary photographers who use buildings in their work in a new way In these photographs they respond to the work of prominent architects with their own singular interpretations Here are Andreas Gursky's photos of the Stockholm Library by Gunnar Asplund Thomas Ruff's photos of several works by Herzog de Meuron Hiroshi Sugimoto's photos of Le Corbusier's Villa Savoye as well as works by Candida Hofer Jeff Wall Gunter Rambow and Balthasar Burkhard *Architecture Without Shadow* is a beautiful and valuable book on one of the prominent movements in contemporary photography *Architecture without shadow : [exhibition "Architecture without shadow" held at the Centro Andaluz de Arte Contemporáneo in Seville, and the Centro de Cultura Contemporánea in Barcelona]* Gloria Moure, 2000

The Theory of Architecture Paul-Alan Johnson, 1994-04-18 The Theory of Architecture Concepts Themes Practices Paul Alan Johnson Although it has long been thought that theory directs architectural practice no one has explained precisely how the connection between theory and practice is supposed to work This guide asserts that architectural theory does not direct practice but is itself a form of reflective practice Paul Alan Johnson cuts through the jargon and mystery of architectural theory to clarify how it relates to actual applications in the field He also reveals the connections between new and old ideas to enhance the reader's powers of critical evaluation Nearly 100 major concepts themes and practices of architecture as well as the rhetoric of architects and designers are presented in an easily accessible format Throughout Johnson attempts to reduce each architectural notion into its essential concept By doing so he makes theory accessible for everyday professional discussion Topics are arranged under ten headings identification definition power attitudes ethics order authority governance relationship and expression Areas covered under these headings include Utopian thought in theories of architecture Advocacy and citizen participation in architecture The basis of architectural quality and excellence The roles of the architect as artist poet scientist and technologist Ethical obligations of architecture Rationales for models and methods of design How authority is determined in architecture How architects structure their concepts Conventions of communication within the architectural profession Each section begins by showing the etymology of key terms of the topic discussed along with a summary history of the topic's use in architecture Discussions probe the conceptual and philosophical difficulties of different theories as well as their potential and limitations in past and present usage Among the provocative issues discussed in terms of their relationship to architecture are chaos theory feminism service to the community and the use of metaphor Johnson points out with stunning clarity the intentions as well as the contradictions and inconsistencies of all notions and concepts All architects and designers

as well as students and teachers in these disciplines will gain many insights about architectural thought in this groundbreaking text
