Brickwood, 2009-04-17 The ubiquitous concept of the interdisciplinary is too narrow a term to capture the intensity and
plurality of today's networks of collaboration Collaborative practice not only extends its reach across all disciplines but
across whole sectors and levels of society There is a gathering recognition that we are witnessing the rise of an era of
multidimensional collaboration which is not only leading to significant innovation and commercial advantage but also
embodies in and of itself a powerful transformation in our ways of producing consuming and relating to one another and to
our world Uncommon Ground explores a number of case studies often involving major corporations and Academies
interspersed with reflective essays by some of today's leading thinkers and practitioners By juxtaposing the concrete and the
reflective we have begun a process of mapping the varieties of experimental forms that are emerging as the various actors
attempt to navigate the opportunities and balance the contradictory forces and values at work The result is a range of
practical and inspiring examples providing insight into the complex rewards and challenges of cross sector collaboration
