themes discussed in this collection include the history development and defining features of modern technology the relationship between scientific theories and their technological instantiations the nature of human agency and the essence of education in the age of technology and the ethical political and environmental impact of our current techno scientific customs This volume also addresses the connection between Heidegger s critique of technology and his involvement with the Nazis Finally and with contributions from a number of renowned Heidegger scholars the original essays in this collection will be of great interest to students of Philosophy Technology Studies the History of Science Critical Theory Environmental Studies Education Sociology and Political Theory

The Nature of Classical Collecting Alexandra Bounia,2017-07-05 Contrary to general traditional belief the origins of collecting as a systematic activity that refers to the satisfaction of symbolic rather than actual needs was not an invention of the Renaissance Collecting made its first appearance in European prehistory was a subject of interest and debate for the ancient Greeks and Romans and has been present continuously ever since The Nature of Classical Collecting is the first thorough discussion of collecting in the ancient classical world Based on extensive research of the literary sources available and complemented wherever necessary from references to archaeological and epigraphic evidence it is a thought provoking attempt to consider a phenomenon which has been in the centre of the western mind set since its very early origins

Sociology about Art Sara Malou Strandvad,Quirijn Lennert van den Hoogen,Manuel Reyes,2024-12-02 For sociologists making distributing and using art and cultural products constitute social practices yet sociologists disagree on how to investigate these practices Organised around three main schools of thought critical sociology symbolic interactionism and social systems theory Sociology about Art serves as an introduction to and a self reflective discussion about how sociologists study the Arts Providing a wide spectrum of approaches in art sociology the book focuses on examining not only the famously cited theorists notably Bourdieu Becker and Peterson but also offers an overview of the sociologists who are often overlooked Hennion Heinich Luhmann and Van Maanen among others In presenting these various approaches the crux of discussion concerns the status of art in sociological analyses Following a critical assessment of the classical theories and assessing the risks of failing to observe the function of art the authors contend that the perspective on art works their forms affordances and meanings can and should be integrated into sociological research for it to become a sociology that is truly about art A vital resource for students seeking to understand sociological discourses surrounding art and set up their own research projects Sociology about Art will appeal to scholars and students of sociology with interests in the arts and cultural policy
