Changing Countries:

Climate Change and Global Food Security Rattan Lal, Norman Uphoff, B.A. Stewart, David O. Hansen, 2005-05-26 In order to feed their burgeoning populations developing nations will need to double cereal production by the year 2050 This increase will have to come from existing land as little potential exists for bringing new land under cultivation a daunting prospect when one realizes that increased use and significantly higher concentrations of carbon

COVID-19 and Climate Change in BRICS Nations Ndivhuho Tshikovhi, Andréa Santos, Xiaolong Zou, Fulufhelo Netswera, Irina Zotovna Yarygina, Sriram Divi, 2023-12-29 This book provides a quantitative and qualitative overview of the overall impact that the COVID 19 pandemic had on the capacity of Brazil Russia India China and South Africa BRICS countries to reshape global climate governance and explore areas for mutual cooperation BRICS countries account for nearly 40% of the total world population and are thus intrinsic to the global efforts and results for Agenda 2030 the Sustainable Development Goals the Paris Agreement and beyond The outbreak of the COVID 19 pandemic does not at first appear to be directly related to BRICS policies to address climate change but it has influenced the pace and nature of climate action due to the loss of human and financial capital This book examines this correlation and raises awareness of the COVID 19 pandemic s impacts and potential solutions on BRICS climate strategies Drawing on case studies from each country the authors use examples from urban governance energy transition strategy foreign investment and more to illustrate how COVID 19 has negatively or positively impacted climate data and draw wider conclusions about the long term climate policies that may be implemented This volume will be of great interest to students and scholars of climate change environmental politics and governance and global development studies
