Changing Maine:

The Anthropology of Postindustrialism Ismael Vaccaro, Krista Harper, Seth Murray, 2015-10-08 This volume explores how mechanisms of postindustrial capitalism affect places and people in peripheral regions and de industrializing cities While studies of globalization tend to emphasize localities newly connected to global systems this collection in contrast analyzes the disconnection of communities away from the market presenting a range of ethnographic case studies that scrutinize the framework of this transformative process analyzing new social formations that are emerging in the voids left behind by the de industrialization and introducing a discussion on the potential impacts of the current economic and ecological crises on the hyper mobile model that has characterized this recent phase of global capitalism and spatially uneven development
