**Angels and Devils in Hell** Tomasz P. Krzeszowski,1997      **Inventing 'Easter Island'** Beverley Haun,2008-01-01  
Easter Island or Rapa Nui as it is known to its inhabitants is located in the Pacific Ocean 3600 kilometres west of South America Annexed by Chile in 1888 the island has been a source of fascination for the world beyond the island since the first visit by Europeans in 1722 due to its intriguing statues and complex history Inventing Easter Island examines narrative strategies and visual conventions in the discursive construction of Easter Island as distinct from the native conception of Rapa Nui It looks at the geographic imaginary that pervaded the eighteenth century a period of overwhelming imperial expansion Beverley Haun begins with a discussion of forces that shaped the European version of island culture and goes on to consider the representation of that culture in the form of explorer texts and illustrations as well as more recent texts and images in comic books and kitsch from off the island Throughout Easter Island is used as a case study of the impact of imperialism on the view of a culture from outside The study hinges on three key points an inquiry into the formation of Easter Island as a subject an examination of how the constructed space and culture have been shaped reshaped and represented in discursive spaces and a discussion of cultural memory and how the constraints of foreign texts and images have shaped thought and action about Easter Island Richly illustrated and unique in its findings Inventing Easter Island will appeal to cultural theorists anthropologists educators and anyone interested in the history of the South Pacific

**A Monastery for the Ibex** Wilko Graf von Hardenberg, 2021-02-23 Gran Paradiso National Park is Italy's oldest and was instrumental in preventing the extinction of the Alpine ibex between World War I and just after World War II. Today there are more than 30,000 ibex living in the Alps, all of which descended from that last colony protected in Gran Paradiso under Mussolini's rule. Wilko Graf von Hardenberg merges the history of conservation with the area's social history and Italy's larger political history to produce a multifaceted narrative about the park as an institution, the conflicts it triggered, and practices adopted to manage the ibex despite hurdles placed by the fascist regime. The book's central argument is that in fascist Italy, preservation propaganda notwithstanding, was a product of the regime's continuities with the previous liberal system. Italy's total fascist transformation, accomplished only more than a decade after Mussolini took power, virtually unmade the early successes of preservation set in place by the nascent nature state in the regime's early years. Despite this conflict, conservationists succeeded in preserving the ibex. Hardenberg positions this success within the broader history of science, conservation, and tourism in fascist Italy and the Alpine region, creating a comprehensive historical background and comparative reference to ongoing debates about the role of nature conservation in general and in relation to the state and its agencies.
