Tomorrow through the Past Jon Lewis,2008-12-18 Tomorrow Through the Past Neal Stephenson and the Project of Global Modernization is the first collection of scholarly essays dedicated exclusively to this important voice in contemporary American fiction The collection grew from five essays originally presented at the 2006 XXth Century Literature Conference at the University of Louisville and the contributors are made up of graduate students independent scholars and university professors who hope the collection will aid general readers as well as instructors teaching Stephenson and professionals building the critical response to his work Reading through the lenses of history and linguistic cultural and science fiction studies the essays in the collection examine each of Stephenson s novels from The Big U to The Baroque Cycle as well as his long non fiction work on computer operating systems In the Beginning Was the Command Line Included in this collection is a new interview conducted with Stephenson during the summer of 2006

Eclipse of Man Charles T. Rubin,2014-09-02 Tomorrow has never looked better Breakthroughs in fields like genetic engineering and nanotechnology promise to give us unprecedented power to redesign our bodies and our world Futurists and activists tell us that we are drawing ever closer to a day when we will be as smart as computers will be able to link our minds telepathically and will live for centuries or maybe forever The perfection of a post human future awaits us Or so the story goes In reality the rush toward a post human destiny amounts to an ideology of human extinction an ideology that sees little of value in humanity except the raw material for producing whatever might come next In Eclipse of Man Charles T Rubin traces the intellectual origins of the movement to perfect and replace the human race He shows how today s advocates of radical enhancement are like their forebears deeply dissatisfied with given human nature and fixated on grand visions of a future shaped by technological progress Moreover Rubin argues that this myopic vision of the future is not confined to charlatans and cheerleaders promoting this or that technology it also runs through much of modern science and contemporary progressivism By exploring and criticizing the dreams of post humanity Rubin defends a more modest vision of the future one that takes seriously both the limitations and the inherent dignity of our given nature
