## **Coping With Epilepsy:**

*Coping with Epilepsy* Fiona Marshall, Pam Crawford, 2000 Epilepsy can be frightening whether you're a child or adult. But if you or your child is diagnosed as epileptic, there is a wealth of useful advice you can draw on. *Coping with Epilepsy* contains all the information on what epilepsy is, the different types of epilepsy that there are, and how they are diagnosed and treatment options, including information on drugs and surgery. There is practical advice on living with epilepsy, particular issues for women, and how to feel more in control. An essential book for all sufferers and their families. **Coping with Epilepsy** Pamela Crawford, 2013-06-20 Epilepsy, traditionally the Cinderella of medicine, now has a higher profile thanks to the efforts of the World Health Organisation, who have led a campaign called 'Out of the Shadows' to make the public more aware of the condition. In particular, there has been much more awareness of the plight of women with epilepsy and their reproductive health, especially the problem of certain anti-convulsant medications and their effects on the unborn child. This new edition strengthens the focus on women and gives a strong update on drugs and surgery, a sometimes neglected but modern approach which may actually cure epilepsy. **Coping with Epilepsy in Children and Young People** Susan Elliot-Wright, 2009 Looks at what parents and family can do to minimize the impact of epilepsy and to reduce the risk of seizures from early childhood through to young adulthood. **Coping with Life Stress, volume II** Alexander V. Libin, Elena V. Libin, Walter Erich Penk, Nawar Shara, 2024-02-09 This Research Topic is the second volume of the Research Topic 'Coping With Life Stress'. Please see the first volume here. Existing studies on coping with stress and life difficulties are very contradictory. Traditional approaches, while identifying cognitive, emotional, and behavioral aspects of coping, often confuse the modality of the strategy with its functionality and outcome. This conceptual drawback presents quite a few challenges to the study of efficient and inefficient strategies. Perception of the incongruence between modalities (cognitive, emotional, or behavioral) of a particular strategy and its functionality, or organizational efforts (efficient vs. inefficient), hinders the development of an integrated methodology for a generalized coping with life stress process. The absence of general principles for classification of efficient and inefficient coping poses methodological, as well as practical, difficulties in their diagnostics and differentiation, thereby causing additional obstacles in the systematic study of this important phenomenon. The 'Coping with Life Stress' approach is focused on research based on the translation of scientific knowledge regarding problem-solving processes into practical applications geared toward improvement of individual life learning or coping skills. **Living and Coping with Epilepsy, My Way** Cara Coles, 2015-02-27 You really can have anything you want out of life, no matter what. *Living and Coping with Epilepsy, My Way* is about the author's journey living and dealing with epilepsy, finding the law of attraction, and how her life has changed since then. **Coping with Chronic Disease** Thomas G. Burish, Laurence A. Bradley, 1983 **Epilepsy** Ley Sander, Pam Thompson, 1989 **Managing Epilepsy and Co-existing Disorders** Alan B. Ettinger, Orrin Devinsky, 2002 This comprehensive clinical reference focuses on the challenges faced by neurologists in the

management of epilepsy patients suffering from other medical conditions This is the only book available that provides information on how to treat the unique problems of epilepsy patients who have concomitant medical conditions The contributing authors all of whom are experts in the field discuss different diagnostic and treatment approaches that cannot be found in general textbooks on epilepsy Emphasizing practical clinical information this book is a necessity for all neurologists involved in the care of epilepsy patients Only text available on the problems encountered in managing epilepsy patients suffering from other medical conditions Provides practical information on treatment options Ideal for neurologists and other clinicians who treat epilepsy patients
