Countdown Zero:

Countdown to Zero Day Kim Zetter, 2015-09-01 A top cybersecurity journalist tells the story behind the virus that sabotaged Iran's nuclear efforts and shows how its existence has ushered in a new age of warfare one in which a digital attack can have the same destructive capability as a megaton bomb Immensely enjoyable Zetter turns a complicated and technical cyber story into an engrossing whodunit The Washington Post The virus now known as Stuxnet was unlike any other piece of malware built before Rather than simply hijacking targeted computers or stealing information from them it proved that a piece of code could escape the digital realm and wreak actual physical destruction in this case on an Iranian nuclear facility In these pages journalist Kim Zetter tells the whole story behind the world's first cyberweapon covering its genesis in the corridors of the White House and its effects in Iran and telling the spectacular unlikely tale of the security geeks who managed to unravel a top secret sabotage campaign years in the making But Countdown to Zero Day also ranges beyond Stuxnet itself exploring the history of cyberwarfare and its future showing us what might happen should our infrastructure be targeted by a Stuxnet style attack and ultimately providing a portrait of a world at the edge of a new kind of war

Countdown Zero Chris Rylander, 2015-02-03 From Chris Rylander author of the breakout hit the Fourth Stall saga comes the second book in the Codename Conspiracy series a funny and clever mash up of middle grade school story and spy adventure Ever since Carson Fender was let go by the secret agency that had enlisted his services to help foil a nefarious plot perpetrated by one of their former agents he's been back to hanging with his friends pulling pranks and not having to lie to everyone about how he's spending his days And that's for the best isn't it Of course this was all before a note showed up in his school lunch informing him that Agent Nineteen had three days left to live and that there might still be someone inside the Agency working against them Carson has always been able to rely on his friends but what happens when there's no one left to trust

Countdown Zero Thomas H. Saffer, Orville E. Kelly, 1983 250 000 U S servicemen were exposed to incredibly high levels of radiation between 1945 and 1962 without their knowledge or consent For the government the experiment was simple how would soldiers perform under the shadow of the bomb For the many GI's who witnessed bomb tests the results have been harrowing more and more atomic veterans fall victim to incurable cancer and undiagnosed illnesses every year This hard hitting very personal account exposes decades of official indifference gross negligence and contempt for life on the part of the U S government Both the government and the armed forces have refused to take responsibility for the atomic veterans Working with the National Association of Atomic Veterans Thomas H Saffer and Orville E Kelly victims of atomic testing themselves did much to bring this situation to public attention This book horrifying in the facts it relates is also a moving even hopeful testament to the men who knew that the whole truth about nuclear testing had to be exposed
