American Security In An Interdependent World:

American Security in an Interdependent World Atlantic Council of the United States. Conference, Zbigniew Brzezinski, 1988 This book reflects the Atlantic Council's long time concern with interdependence and the problems and challenges it poses for the United States and for U.S. allies and friends The book explores the new breadth and depth of interdependence which has profoundly changed in both respects since World War II particularly in the last few years The fundamental premise is that recognizing together the collective strength that interdependence provides the nations of the West can do together what no single nation could hope to accomplish acting alone Contents include U.S. Interests Around the World NATO's Enduring Foundation The Convention Imbalance in Europe and Alliance Economic Constraints Strategic Stability and Arms Control ANZUS and Pacific Basin Security U.S. Japanese Security Relations and the Future of Asia The Interrelationship of Atlantic and Pacific Issues Allied Security in an Interdependent World Co published with the Atlantic Council of the United States

American Security and the Global War on Terror Edwin Jacob, 2020-04-08 This book delivers an interpretive framework for making sense of today's geopolitical landscape and casts new light on the impact ideology and technology have had on American foreign policy and contemporary security practices Edwin Daniel Jacob argues that America's security practices in the Global War on Terror have been guided by an anachronistic Cold War logic that has subordinated strategy to tactics Jacob shows that deep rooted prejudices and presuppositions regarding American exceptionalism have had a disastrous impact on the policies of the United States not only in dealing with terrorism but also in seeking to impose American hegemony in the Middle East Ineffectual security practices of dubious moral character from rendition and torture to preemptive strikes and nation building to drones and assassinations privilege exigency over ethics Yet the result of this post strategic approach to security where interchangeable tactics like these masquerade as strategy only increases insecurity Jacob offers a fresh perspective on American foreign policy that links national security with human security in regional terms This approach highlights the need for order predictability and stability the cornerstone of political realism Making use of insights derived from Machiavelli Hobbes Marx Weber Schmitt and Morgenthau this interdisciplinary work provides an overview of American foreign policy in the twenty first century and speaks to crucial themes in the fields of history political science and sociology

Reconciling Human Rights and U.S. Security Interests in Asia United States. Congress. House. Committee on Foreign Affairs. Subcommittee on Asian and Pacific Affairs, 1983 QDR 2001: Strategy-Driven Choices for America's Security, **Hemispheric Security And U.s. Policy In Latin America** Augusto Varas, 2019-04-11 This book analyzes the evolution of inter American security relations in recent decades providing a variety of views on these topics from the United States and Latin America It includes an analysis of regional security interactions around Central America the Caribbean and South America *The Outlook for U.S.-China Relations Following the 1997-1998 Summits* Peter H. Koehn, 1999 At the end of the 20th Century the focus of global attention and concern is on the future

relationship between the world's most influential nation and its most populous one. The series of high level meetings and the exchange of unusually long summit visits that occupied the center of the world stage in the late 1990s reveal that both sides recognize the other's global importance. In the words of President Bill Clinton, the role China chooses to play will powerfully shape the next century. The years 1997 and 1998 will be remembered by many for the critically acclaimed summit visits of Jiang Zemin to the United States and Bill Clinton to China. This book moves beyond the Clinton-Jiang summits of 1997-1998 to explore long term prospects in light of recent developments. Nineteen scholars from diverse disciplines including eight from China mainland institutions address the outlook for security relations in the Asia Pacific Region, prospects for strategic partnership, issues concerning Taiwan, Tibet and trade, the potential for information technology and educational exchanges, future competition for natural resources, changing images of each other and other critical dimensions of expanding non state relationships. The interaction of China and the United States promises to constitute the world's most important bilateral relationship well into the 21st Century. To be constructive and enduring relationships must be based on mutual understanding and respect. This volume provides an opportunity to advance both foundations among students, scholars, policy makers and the attentive public in the East and the West.
