Anticancer Drugs:

The Anticancer Drugs William B. Pratt, 1994 This text offers an up to date review of the field of cancer chemotherapy including some of the new approaches to biological treatments of cancer and potential targets for new drug design A detailed description of the pharmacology mechanisms of action toxicity resistance mechanisms and clinical usefulness of each class of drugs is given The authors emphasize concepts involved in determining the mechanism of action and development of resistance the determinants of drug responsiveness to chemotherapeutic agents and a rationale for their clinical use in various types of cancer The text is organized in a way that makes it easy for the reader to conceptualize how drugs work and categorize them by their mechanism of action It facilitates an understanding of the rationale for chemotherapy with respect to the biology of the cancer cell and to tumor growth kinetics Drawing on the fields of authors draw on the fields of medicinal chemistry pharmacology biochemistry cell biology molecular biology and clinical medicine this timely book is extensively referenced and provides a historical background for the development of each class of drugs *Cancer Pharmacology* Ashkan Emadi, Judith E. Karp, 2019-12-03 *Cancer Pharmacology An Illustrated Manual of Anticancer Drugs* provides a one stop guide to the essential basic and clinical science of all the effective life prolonging drug therapies in oncology From traditional cytotoxic agents to targeted genomic epigenomic hormonal and immunotherapeutic agents this book covers the staggering advances in cancer pharmacology that are propelling new standards of care for common and uncommon malignancies Beautifully illustrated throughout each chapter contains visually engaging figures detailing the tumor microenvironment chemical structures of agents pharmacodynamics pharmacokinetics pharmacogenomic and molecular properties of the various agents and their mechanisms of action As the first illustrated book of its kind this highly visual text uses a uniform approach to each cancer drug class and agent presented in the book and covers alkylating agents antimetabolites antimetotics epigenetic modulators hormonal agents targeted therapies monoclonal antibodies immunotherapeutic agents and much more Flow diagrams clinical tables and bulleted text further explain important information pertaining to each cancer drug class including their indications mechanisms of action potential adverse reactions dosing and dose adjustments and safety monitoring Organized in an easy to digest format and replete with detailed images clinical pearls and end of chapter Q As this evidence based reference presents all major classes agents targets and approaches to cancer pharmacotherapy Whether you are a trainee a clinical scientist or a clinician in practice the book is an ideal reference It presents challenging information in an instructional way illustrates key concepts for ease of retention and poses tough questions so readers can problem solve potential scenarios and test their pharmacologic acumen Written by leading experts in oncopharmacology this first of its kind manual is a must have for anyone involved in the basic translational or clinical aspects of oncology and hematology including clinicians pharmacists nurses and trainees **KEY FEATURES** Includes visual depictions of chemical structures pharmacokinetics pharmacodynamics and pharmacogenomics associated with each

class of agents Describes how chemotherapy targeted therapy immunotherapy and hormonal therapy work and why they are expected to work adjuvantly neoadjuvantly and in combination with other modalities Over 100 highly stylized images and numerous comprehensive tables Covers challenges related to drug development drug approval and regulatory issues in relation to anticancer treatments All chapters conclude with clinical pearls and detailed clinical Q As with descriptive rationales Purchase includes access to the ebook for use on most mobile devices or computers

Anticancer Therapeutics

Adam Todd,Paul W. Groundwater,Jason H. Gill,2017-12-08 An integrated presentation of the basic science and clinical applications of anticancer agents Aimed at both undergraduate and postgraduate readers this unique text provides readers with a fully integrated presentation of all aspects of the science of anticancer drugs including their chemistry pharmacology and clinical applications After heart disease cancer is the number one killer worldwide and the tumor microenvironment is forever changing creating an ever greater demand for safer more effective anticancer agents In response to that demand the 100 billion cancer drug market continues to grow with our increased understanding of cancer leading to new drugs being used clinically almost every year Anticancer Therapeutics is divided into three sections Section 1 is an introduction to cancer and therapeutics and covers the etiology and cellular and molecular basis of cancer In Section 2 the authors focus on the anticancer agents their discovery synthesis mode of action mechanisms of resistance and adverse reactions Section 3 focuses on specific cancers explaining how and why the various agents discussed in Section 2 are used both individually and in combination to treat different cancers Integrates aspects of basic science including chemistry and pharmacology and clinical medicine in relation to cancer therapeutics Written by an author team comprising specialists in medicinal chemistry pharmacology and oncology Features full color images throughout illustrating how drugs bind to cellular targets and exert their pharmacological effect Divided into three sections covering the etiology and cellular and molecular basis of cancer anticancer agents and drug applications for different cancers Providing the reader with an integrated understanding of all aspects of the science of anticancer agents this is an ideal textbook for undergraduates studying medicine nursing medicinal chemistry pharmacy pharmacology and other allied health life sciences It is also a valuable bench reference for pharmacists medics and pharmaceutical researchers working in both academia and industry
