The Creation: Its Infinite Features and Finite Realms Volume Iv Jack Hetrick, 2017-02-27 In 1996 a discovery was made of a body of knowledge which is believed to have important implications for the future of man In that year it was discovered that many cultural artifacts produced by man since about 30 000 BC possess an unusual symbolism In *The Creation Its Infinite Features and Finite Realms* artifacts of man that possess this unusual symbolism are referred to as inspired sources Volume IV of *The Creation* series addresses inspired sources that pertain to the destiny of man to carry the gospel of Jesus Christ and expand the kingdom of God to other stellar systems in the Milky Way Galaxy and ultimately to distant parts of the universe in the future age This study also briefly addresses the means that is spaceship propulsion wormhole travel and black hole travel by which man and other living entities who serve the Creator in the present age will travel to stellar and galactic destinations in the future age

God Gametes and The Planet of the Butterfly Queen Robert Jameson, 2010-02-08 The *God Gametes* theory is a refreshing look at what may be both the meaning of life and the reason for its creation It argues that life on earth and in fact our human consciousness are universal entities A model is presented that assumes our universe is a tiny part of a multiverse arguing that the multiverse is a hierarchical structure each level a reproductive system of intelligent living systems on the next higher level We take a fictional look at our parent species on that next higher level to find they are far more complex creatures than us but their universe is older and will soon run out of fuel to then die Parent species know that to preserve their life and the billions of years of heritage they created they must reproduce on a lower multiverse level This we believe is why humans have developed many features such as a large brain that make our survival on earth more difficult Yet these features have evolved because they are needed by the reproductive system of the parent species from lulu.com

The God Equation Mike Hockney, 2013-08-26 Euler's Formula is the most beautiful equation in mathematics Yet it's much more It governs the universe and defines the soul Euler's Formula perfectly complements Leibniz's Monadology They form the most powerful intellectual combination ever capable of establishing a true grand unified theory of everything including religion It provides a rational explanation of near death and out of body experiences and homeopathy It overturns Einstein's principle of relativity providing the same results via an absolute framework that restores the reality principle In this groundbreaking book we provide the solution to the Cartesian mind body problem via the Fourier transform which has the Euler Formula as its engine We present the Riemann sphere which works in perfect harmony with the Euler Formula as the ideal working model of the human soul And we give the first ever technical explanation of the process of reincarnation The Euler equation is everything you thought and more It's divine

Creation Hans Schwarz, 2002-10-22 Schwarz first surveys scientific explanations for the origins of the universe and of life and discusses the scientific understanding of matter space time and determinism He then reviews the history of Christian responses to science's discoveries including a summary of reactions from Christian scientists He completes his analysis with a proposal for the development of a Christian
