European Yearbook of International Economic Law 2013 Christoph Herrmann, Markus Krajewski, Jörg Philipp Terhechte, 2013-04-02 Part one of Volume 4 2013 of the European Yearbook of International Economic Law offers a special focus on recent developments in international competition policy and law International competition law has only begun to emerge as a distinct subfield of international economic law in recent years even though international agreements on competition co operation date back to the 1970s Competition law became a prominent subject of political and academic debates in the late 1990s when competition and trade were discussed as one of the Singapore issues in the WTO Today international competition law is a complex and multi layered system of rules and principles encompassing not only the external application of domestic competition law and traditional bilateral co operation agreements but also competition provisions in regional trade agreements and non binding guidelines and standards Furthermore the relevance of competition law for developing countries and the relationship between competition law and public services are the subject of heated debates The contributions to this volume reflect the growing diversity of the issues and elements of international competition law Part two presents analytical reports on the developments of the regional integration processes in North America Central Africa and Southeast Asia as well as on the treaty practice of the European Union Part three covers the legal and political developments in major international organizations that deal with international economic law namely the IMF WCO WTO WIPO ICSID and UNCTAD Lastly part four offers book reviews of recent works in the field of international economic law

many ways in which these fields often considered independent of one another interact and overlap in the creation of the internal market This process of convergence between competition and public procurement law is particularly apparent in the 2014 Directives on public procurement which consolidate the principle of competition in terms very close to those advanced by the author in the first edition This second edition builds upon this approach and continues to ask how competition law principles inform and condition public procurement rules and whether the latter in their revised form are adequate to ensure that competition is not distorted The second edition also deepens the analysis of the market behaviour of the public buyer from a competition perspective Proceeding through a careful assessment of the general rules of competition and public procurement the book constantly tests the efficacy of these rules against a standard of the proper functioning of undistorted competition in the market for public procurement It also traces the increasing relevance of competition considerations in the case law of the Court of Justice of the European Union and sets out criteria and recommendations to continue influencing the development of EU Economic Law
