Modern American Antitrust Law Heinrich David Kronstein, John Thomas Miller Jr., Ivo E. Schwartz, 2012-06-01 Institute For International And Foreign Trade Law Of The Georgetown University Law Center Washington D C *Federal Statutory Exemptions from Antitrust Law*, 2007 **United States Antitrust Law and Economics** Einer Elhauge, 2008 This casebook presents a modern approach to understanding U S antitrust law illuminating the economic analysis that dominates modern antitrust analysis in a straightforward way that minimizes technical jargon and makes the underlying economic concepts accessible to a broad audience The cases are carefully edited to present the facts and issues clearly and succinctly with the focus on extensive questions that probe those issues and show how to apply modern antitrust economic analysis to them The result is a book that is quite compact fewer than 800 pages but covers the full waterfront of antitrust issues and generates plenty of multi layered points and ideas to fill

a class All the recent Supreme Court antitrust cases are fully incorporated into the structure of the book as are all the relevant agency guidelines The merger section focuses on modern agency practices and merger theories and selected cases that illustrate them rather than on outdated Supreme Court cases that no longer describe current merger enforcement

The Modernisation of EC Antitrust Law Rein Wesseling,2000-07 In recent years European Community EC competition law has come under fire Continued criticism of all aspects of the means by which EC competition law is enforced has brought to light ineffectiveness of the present system Consequently the European Commission has responded by issuing the White Paper on Modernisation which sets out its vision on the future of EC competition law This new book takes a step back and tries to understand the current challenges to EC competition policy by examining the origins of the Community s competition law system In the first part of the book the author sketches the development of Community competition law enforcement between the European Economic Community established in 1958 and the European Union of today Taking this dynamic perspective on EC competition law the second part of the book addresses topical problems of EC competition policy the pertinent objectives the institutional framework the division of jurisdiction between the Community and Member States and decentralised enforcement of Community law Notably the author s conclusions diverge considerably from the analysis found in the Commission White Paper on Modernisation The author proposes various alternative solutions to the existing problems which arguably fit better within the overall constitutional development of the Community than the solutions offered by the Commission The book will be of interest to competition lawyers as well as to all those interested in the constitutional development of the European Community

Competition and Antitrust Law Ariel Ezrachi,2021 Explores the promise and limitations of competitive market dynamics looking at the threats to competition cartels agreements monopolies and mergers and the laws in place across the US and European Union to safeguard the process of competition

Federal Antitrust Law Daniel J. Gifford,Leo J. Raskind,2002 The first chapter of this book provides an historical review of antitrust law in terms of the political and economic ideas which have shaped it throughout its development In the successive chapters the authors provide a sense of the manner in which changes in the underlying economic analysis have shaped the application of the statutes by the enforcement agencies and the courts The authors have addressed the antitrust issues raised by recent changes in technology in the rise of global markets and in the structure of health care markets by devoting three separate chapters to Intellectual Property International Trade and Health Care Author Commentaries throughout the book are designed to probe the doctrinal and policy issues raised by the case excerpts In keeping with the objective of providing the economic analysis that may amplify and clarify the legal and policy issues the authors have also taken into account recent trends in the relevant economic literature Professors and adjunct professors may request complimentary examination copies of LexisNexis law school publications to consider for class adoption or recommendation Please identify the book s you wish to receive provide your institutional contact information and submit your request here
