Aspects Of The Computer Based Patient Record:

Aspects of the Computer-based Patient Record Marion J. Ball,1992 In a recent study the Institute of Medicine IOM concluded that the computer based patient record is an essential technology for health care and recommended its prompt development and implementation This volume contains the position papers that formed the basis for the IOM s recommendations incl   Aspects of the Computer-based Patient Record Marion J. Ball,M.F. Collen,1992 The increasing need of patients for better access to good quality care the great mobility of people in this nation and their quest for care from a variety of health care professionals The need for faster and lower cost electronic claims reimbursement processes all have made it very clear that it has become essential that throughout this country the current obsolescent paper based medical records must be replaced as soon as possible by computer based patient records In recognition of this high priority need the Institute of Medicine IOM formed the Committee on Improving the patient record The result was the publication of the computer based patient record An essential technology for health care The support of this IOM project by members of its committee and subcommittees resulted in the preparation of such a large number of worthy supporting papers that it was not possible to include them in the IOM publication Accordingly the IOM authorized the editors of this book to publish separately some papers that fit appropriately into this more technology oriented book   Aspects of the Computer-based Patient Record Harold P. Lehmann,Patricia A. Abbott,Nancy K. Roderer,Adam Rothschild,Steven Mandell,Jorge Ferrer,Robert E. Miller,Marion Ball,2013-02-14 One of the hottest political issues today concerns ways to improve national healthcare systems without incurring further costs An extensive study by the Institute of Medicine IOM in the United States formally reported that computer based patient records are absolutely necessary to help contain the cost explosion in health care The information obtained from experts the studies conducted and the conclusions that went into the IOM s report have now been collected in Aspects of the Computer Based Patient Record A large portion of the volume discusses the state of the art in existing computer based systems as well as the essential needs which must be addressed by future computer based patients records A final section in the book discusses implementation strategies for changing to the electronic system and practical issues Who will bear the final cost How and when will healthcare providers who use the system be trained This volume contains the concise valuable information which hospital administrators hospital systems designers third party payer groups and medical technology providers will need if they hope to successfully transit to hospital systems which use a computer based patient record   **The Computer-Based Patient Record** Institute of Medicine,Committee on Improving the Patient Record,1997-10-14 Most industries have plunged into data automation but health care organizations have lagged in moving patients medical records from paper to computers In its first edition this book presented a blueprint for introducing the computer based patient record CPR The revised edition adds new information to the original book One section describes recent developments including the creation of a computer based patient record institute An international chapter highlights

what is new in this still emerging technology An expert committee explores the potential of machine readable CPRs to improve diagnostic and care decisions provide a database for policymaking and much more addressing these key questions Who uses patient records What technology is available and what further research is necessary to meet users needs What should government medical organizations and others do to make the transition to CPRs The volume also explores such issues as privacy and confidentiality costs the need for training legal barriers to CPRs and other key topics *Aspects of the Computer-based Patient Record* Harold P. Heiks,1995 The United States health care system is undergoing significant changes in this last decade of the 20th century Pressures to reduce health care costs and improve health care quality from the federal and state governments employers third party payers and consumers have greatly contributed to substantial changes in both the structure of the system and the way in which helath care is delivered Health care organizations are becoming vertically integrated Various provider groups once considered competitors are now partenering to provide a seamless system in which to deliver health care One of the most critical elements needed to tie provider groups employers payers and consumers together in order to make these changes work effectively and efficiently is shared data and information Information technology development while lagging

behind most other American industries is finally reaching health care Powerful low cost computers and networking is making it practical to extend information technology to the actual delivery points within health care systems Computerization of health information offers many opportunities to improve the quality of the nation s health care and reduce it s costs however a fundamental change in information gathering use and access is needed This fundamental change in computer based patient record CPR systems This paper presents the results of a thorough investigation of CPR systems including a description of the technology and how the technology fits in to the information technology dynalics in health care an assessment of the issues and obstacles concerning this technology examples of health care organizations that have implemented such systems and a review of system software and vendors The paper also presents elements of a high level plan to develop and implement a system within a health care organization Abstract **Health Sciences Environment and Librarianship in Health Sciences Libraries** Lucretia McClure,1999 *Security Features for Computer-based Patient Record Systems* CPRI Work Group on Confidentiality, Privacy, and Security,1996 **Application of Technology to Improve Productivity in the Service Sector of the National Economy** ,1973 Conference report on Innovation and productivity increase in the service sector and the public service sector in the USA covers applications of technology and automation in such areas as education health services and urban area services etc and includes educational technology Diagrams flow charts references and statistical tables Conference held in Washington 1971 November 1 and 2 **Evaluation of Hospital Information System (HIS) in Advanced Cure Medical Center, UAE** Shijin Prasad,2015-02-18 Hospital information systems HIS have changed spectacularly since the introduction of computers in health care organizations in Abu Dhabi as per the Health Authority HAAD Standards These changes were inevitable not only because of the changes in the information technology IT but mainly because of the realization of the benefits that a computerized hospital offers Initially HIS incorporated financial and partial patient care systems Later many hospitals started adopting specialized systems in other areas such as Outpatient Department OPD Inpatient Department IPD Emergency Department radiology and laboratory departments Support Service like Facility Management Team Insurance Billing Purchase Medical Records IT and Other Services with more emphasis to patient interest Now major hospitals and clinics are focusing on complete Paperless HIS by using Electronic Health Records EHR Electronic Medical Records EMR and E Authorizations of Insurance Approvals As a result the number of the organizational personnel who directly interact daily with computers has also recorded an explosive growth and changing the facilities to Paperless Environment Due to the complex environment that hospitals function in the use of HIS has become very important is of importance When choosing an Information System IS hospitals must avoid pitfalls and errors in order to achieve a sustainable computer management information system The chain or cascade involved in this system include supplier vendor local hospital environment and administration on campus IT staff continuous quality improvement and end users Therefore the evaluation of HISs is an extremely important issue which helps to test the effectiveness of these systems

According to DeLone and McLean 1992 the most widely known measure of IS evaluation is user satisfaction The literature suggests that user satisfaction can play a vital role and can affect users behavior toward computer use which in turn can also affect the actual usage of the system **1994 IEEE 13th Annual International Phoenix Conference on Computers and Communications** ,1994 **New Horizons in High Technology Medicine** David Ashton,1997 **Health Progress** ,1992 The Joint Commission Journal on Quality Improvement ,2003 Official Gazette Philippines,2009
