**Profanity, Obscenity and the Media** Melvin J. Lasky,2014-10-15 This is the second volume of Melvin J Lasky s The Language of Journalism series praised as a brilliant and original study in communications and contemporary language and as a joy to read When it was first published it broke ground in focusing on the comparative styles and prejudices of mainstream American and British newspapers and in its trenchant analysis of their systematic debasement of language in the face of obligatory platitudes and compulsory euphemisms Lasky documents the growing crisis affecting honest thoughtful and independent journalism in the Western world He extends the scope of his first volume in the trilogy and deepens the interpretation He also adds a personal touch of wit and anecdote as one might expect from an experienced international journalist and historian Lasky s examination of the use of formerly forbidden language is a triumph of sinuous semantics In his incisive analysis we see the tortuous struggle of a once Puritanized literary culture writhing to break free of censorship and self censorship This volume on the phenomenon of profanity adds another dimension to Lasky s thesis on mass culture s trivialization of real social and political phenomena It also underscores our society s embrace of banality in standardizing politically correct jargon and slang Readers of the first volume will find here a new range of references to illuminate the detail of what our newspapers have been publishing

**Action against the pollution of the seas by oil**  
Michael A. Braun, 2008-10-21 Seminar paper from the year 2006 in the subject Politics Environmental Policy grade 2.4  
University of Potsdam Lehrstuhl für Intl Organisationen course International regimes Theory empirics and policy language  
English abstract For a long time oceans were seen as vast and restless In recent years however this view has changed since the pollution of the sea became an ever serious problem Fairly cleaned liquids as well as various waste pieces have massive implications on the maritime life In addition intentionally discharged as well as accidentally released oil products propose a huge challenge to the global community Therefore the essay elaborates on this ecological issue with focus on oil tankers as well as it lists up international actions taken against it These are regime induced MARPOL 73/78 modifications at the ships itself such as load on top segregated and protectively located ballast tanks crude oil washing and double hulls The hypothesis of the paper is that the international measures taken have been adequate in general and changed the discharging habits of the industry lastingly The agreements also seem to have made it possible to have the oceans nowadays less polluted than it assumably would have been without them Therefore apart from minor potential future corrections the international regime for protecting the oceans against the pollution from oil tankers was rather successful
