Pediatrics ,1908 *The American Journal of the Medical Sciences* ,1914 Rheumatic Heart Disease Carey Franklin Coombs,1924 **The Psychological Review** ,1904 **Experiencing Pain** Sabrina Coninx,2020-10-12 Although pain is one of the most fundamental and unique experiences we undergo in everyday life it also constitutes one of the most enigmatic and frustrating subjects for many scientists This book provides a detailed analysis of why this issue is grounded in the nature of pain itself It also offers a philosophically driven solution of how we may still approach pain in a theoretically compelling and practically useful manner Two main theses are defended i Pain seems inscrutable because there exists no property that is commonly shared by all types of pain and that is at the same time particular to pain setting it apart from other bodily sensations This applies irrespective of whether we consider the psychological dimensions neural networks causal relations or biological functions of pain Consequently it is impossible to refer to ideal far reaching and ideal distinct generalizations on the matter of pain ii Despite this challenge by focusing on the resemblance relations that hold across pains we can generate scientific progress in explaining predicting and treating pain In doing so the book aims to provide a clear conceptual basis for interdisciplinary communication and a useful heuristic for future research *British Medical Journal* ,1923 **The Boston Medical and Surgical Journal** ,1871 *The Principles and practice of medicine v. 2* Charles Hilton Fagge,1886 *Current Literature* ,1902 The Journal of Surgery, Gynecology and Obstetrics ,1909 *Association Medical Journal* ,1905 **Encyclopaedia medica v. 13, 1903** ,1903 *Encyclopaedia Medica* Chalmers Watson,1903
