Rethinking the American Antinuclear Movement Paul Rubinson,2018-01-29 The massive movement against nuclear weapons began with the invention of the atomic bomb in 1945 and lasted throughout the Cold War Antinuclear protesters of all sorts mobilized in defiance of the move toward nuclear defense in the wake of the Cold War They influenced U S politics resisting the mindset of nuclear deterrence and mutually assured destruction The movement challenged Cold War militarism and restrained leaders who wanted to rely almost exclusively on nuclear weapons for national security Ultimately a huge array of activists decided that nuclear weapons made the country less secure and that through testing and radioactive fallout they harmed the very people they were supposed to protect Rethinking the American Antinuclear Movement provides a short accessible overview of this important social and political movement highlighting key events and figures the strengths and weaknesses of the activists and its lasting effects on the country It is perfect for anyone wanting to obtain an introduction to the American antinuclear movement and the massive reach of this transnational concern

The Antinuclear Movement Jerome Price,1990 **Anti-nuclear Movements** Wolfgang Rüdig,1990 **Silencing the Opposition** Andrew Rojecki,1999 Some of the most important strategic decisions of our times can be traced to compelling official fictions such as Kennedy s missile gap and Reagan s window of vulnerability Exploring links between nuclear arms policy and the visibility of oppositional groups in the media Andrew Rojecki assesses the extent to which antinuclear movements have succeeded in debunking official fictions raising public consciousness and reorienting government policy Silencing the Opposition examines how two cycles of political protest the test ban movement of the first Eisenhower and the Kennedy administrations and the nuclear freeze movement of Reagan s first term were represented by the media He finds that the space devoted to the opposition as well as the quality of the coverage varied widely from the first to the second period reflecting vastly different climates of public opinion and foreign policy Rojecki determines that a subtle shift in political culture has reduced the grounds of legitimacy for citizen protest This shift finds its roots in the rationalization of policy making that characterizes large government agencies think tanks and university departments As public debate over nuclear politics has become increasingly restricted the potential for ordinary citizens to influence policy has become more and more circumscribed while

nuclear weapons have continued to proliferate
