*The Beatles and McLuhan* Thomas MacFarlane,2012-10-26 In the 1960s The Beatles would address like no other musical act a radical shift in the cultural mindset of the late twentieth century Through tools of electric technology this shift encompassed the decline of visual modes of perception and the emergence of a way of knowing based increasingly on sound In this respect the musical works of The Beatles would come to resonate with and ultimately reflect Marshall McLuhan's ideas on the transition into a culture of all at once-ness a simultaneous world in which immersion in vibrant global community increasingly trumps the fixed viewpoint of the individual By engaging with recording technologies in a way that no popular act had before The Beatles opened up for exploration the acoustical space precipitated by this shift In *The Beatles and McLuhan* Understanding the Electric Age scholar and musician Thomas MacFarlane examines how the incorporation of electric technology in The Beatles' art would enhance their musical impact MacFarlane surveys the relationship between McLuhan's ideas on the nature and effects of electric technology and The Beatles' own engagement of that technology offers analyses of key works from The Beatles' studio years with particular attention paid to the presence of cultural metaphors embedded in the medium of multi-track recording and collates these data to offer stunning conclusions about The Beatles' creative process in the recording studio and its cultural implications This work also features the first published transcriptions ever of the complete filmed conversation between John Lennon and Marshall McLuhan on their respective ideas as well as an interview between MacFarlane and McLuhan's son and executor Michael
