Burt, 2007-09-06 Social Capital the advantage created by location in social structure is a critical element in business strategy Who has it how it works and how to develop it have become key questions as markets organizations and careers become more and more dependent on informal discretionary relationships The formal organization

deals with accountability Everything else flows through the informal advice coordination cooperation friendship gossip knowledge trust Informal relations have always been with us they have always mattered What is new is the range of activities in which they now matter and the emerging clarity we have about how they create advantage for certain people at the expense of others This is done by brokerage and closure Ronald S Burt builds upon his celebrated work in this area to explore the nature of brokerage and closure Brokerage is the activity of people who live at the intersection of social worlds who have a vision advantage of seeing and developing good ideas an advantage which can be seen in their compensation recognition and the responsibility they re entrusted with in comparison to their peers Closure is the tightening of coordination in a closed network of people and people who do this do well as a complement to brokers because of the trust and alignment they create Brokerage and Closure explores how these elements work together to define social capital showing how in the business world reputation has come to replace authority pursued opportunity assignment and reward has come to be associated with achieving competitive advantage in a social order of continuous disequilibrium

Joan Didion and the Ethics of Memory Matthew R. McLennan,2021-10-07 Looking at the breadth of Joan Didion s writing from journalism essays fiction memoir and screen plays it may appear that there is no unifying thread but Matthew R McLennan argues that the ethics of memory the question of which norms should guide public and private remembrance offers a promising vision of what is most characteristic and salient in Didion s works By framing her universe as indifferent and essentially precarious McLennan demonstrates how this outlook guides Didion s reflections on key themes linked to memory namely witnessing and grieving nostalgia and the paradoxically amnesiac qualities of our increasingly archived public life that she explored in famous texts like Slouching Towards Bethlehem The Year of Magical Thinking and Salvador McLennan moves beyond the interpretive value of such an approach and frames Didion as a serious iconoclastic philosopher of time and memory Through her encounters with the past the writer is shown to offer lessons for the future in an increasingly perilous and unsettled world

Some Brief Comments on Passing Events Sir Mountstuart Elphinstone Grant Duff,1884 *The Quarterly Journal of Economics* Charles Franklin Dunbar, Frank William Taussig, Abbott Payson Usher, Alvin Harvey Hansen, William Leonard Crum, Edward Chamberlin, Arthur Eli Monroe, 1902 Vols 1 22 include the section Recent publications upon economics Records of Later Life Fanny Kemble, 1883 Includes mention of her trip to Charleston in 1838 Organizational Trust Roderick M. Kramer, 2006-11-30 Over the past two decades the topic of trust moved from bit player to center stage in organizational theory and research Whereas previously it often had been treated as a mediating variable in empirical studies a variable of secondary interest at best trust emerged in the 1990s as a subject deemed important and worthy of study in its own right Despite the importance of the topic to date no single volume currently exists that provides the motivated reader with a sound introduction to and reasonable overview of this rapidly growing widely dispersed multi disciplinary literature Indeed some of the most influential foundational pieces remain scattered in obscure journals or books some of which are not easily found or in some instances no longer even in print Thus the individual scholar hoping to come up to speed with this literature currently had nowhere to turn This reader provides trust scholars and researchers with a handy reference volume a broad guide for graduate students hoping to understand and possibly contribute to this significant and still growing literature and a resource for teachers at the undergraduate level of undergraduate anthropology economics political science psychology organizational sciences and sociology courses
