## **An Addiction To Automobiles:**

**America's Addiction to Automobiles** Chad Frederick, 2017-09-21 A provocative look at our nation's dependency on the automobile and how its potential impact on urban design will either make or break our health economy and quality of life. In this thought-provoking work, author and urban planning expert Chad Frederick scrutinizes the use of automobiles in cities, investigating its role in exacerbating urban inequalities and thwarting sustainability of modern society. Through a comprehensive, thoughtful discussion, Frederick illustrates how the automobile is fundamentally at odds with the very nature of cities. He shows how cars impose huge burdens on our health, equity, environment, local and national economy, and quality of life. Most of all, he shows how automobile dependency has put our entire society at risk. The book delves into the monumental role of automobiles in the development of cities after the Great Depression, impacting the American identity and affecting the way we produce and manage urban spaces. Frederick provides compelling evidence that cities with more diverse modes of transportation are greener, healthier, more prosperous, and even more enjoyable places to live than automobile-dependent cities. He identifies one institution responsible for our inability to improve our cities: the social sciences, and examines the root cause of our inability to make progress toward more multi-modal cities. In conclusion, the author offers a radical solution for moving beyond the underlying logic that forces us to create automobile-dependent cities. **The**

**Psychology of the Car** Stefan Gossling, 2017-06-16 The Psychology of the Car explores automotive cultures through the lens of psychology with the goal of achieving a low-carbon transport future. Worldwide, there are now more than one billion cars, and their number grows continuously. Yet there is growing evidence that humanity needs to reach peak cars, as increased air pollution, noise, accidents, and climate change support a decline in car usage. While many governments agree, the car remains attractive, and endeavors to change transport systems have faced fierce resistance. Based on insights from a wide range of transport behaviors, The Psychology of the Car shows the why of automotive cultures, providing new perspectives essential for understanding its attractiveness and for defining a more desirable transport future. The Psychology of the Car illustrates the growth of global car use over time and its effect on urban transport systems and the global environment. It looks at the adoption of the car into lifestyles, the mobilities turn, and how the car impacts collective and personal identities. The book examines car drivers themselves: their personalities, preferences, and personality disorders relevant to driving. The book looks at the role power, control, dominance, speed, and gender play, as well as the interrelationship between personal freedom and law enforcement. The book explores risk-taking behaviors, as accidental death is a central element of car driving. The book addresses how interventions can be successful, as well as which interventions are unlikely to work, and concludes with how a more sustainable transport future can be created based on emerging transport trends. Features deep analyses of individual and collective psychologies of car affection, moving beyond sociology-based interpretations of automobile culture. Illustrates concepts using popular culture examples that expose ideas about automobility. Shows how fewer, smaller, and more

environmentally friendly cars as well as low carbon transport modes are more socially attractive

**An Addiction to Automobiles** Maurice Platt,1980 [American Automobile Advertising, 1930-1980](#) Heon Stevenson,2008-11-24 This book provides a comprehensive history of American print automobile advertising over a half century span beginning with the entrenchment of the Big Three automakers during the Depression and concluding with the fuel crises of the 1970s and early 1980s Advances in general advertising layouts and graphics are discussed in Part One together with the ways in which styling mechanical improvements and convenience features were highlighted Part Two explores ads that were concerned less with the attributes of the cars themselves than with shaping the way consumers would perceive and identify with them Part Three addresses ads oriented toward the practical aspects of automobile ownership concluding with an account of how advertising responded to the advance of imported cars after World War II Illustrations include more than 250 automobile advertisements the majority of which have not been seen in print since their original publication
