An Alien Music:

Connectionist Representations of Tonal Music Michael R. W. Dawson, 2018-03-13 Previously artificial neural networks have been used to capture only the informal properties of music However cognitive scientist Michael Dawson found that by training artificial neural networks to make basic judgments concerning tonal music such as identifying the tonic of a scale or the quality of a musical chord the networks revealed formal musical properties that differ dramatically from those typically presented in music theory For example where Western music theory identifies twelve distinct notes or pitch classes trained artificial neural networks treat notes as if they belong to only three or four pitch classes a wildly different interpretation of the components of tonal music Intended to introduce readers to the use of artificial neural networks in the study of music this volume contains numerous case studies and research findings that address problems related to identifying scales keys classifying musical chords and learning jazz chord progressions A detailed analysis of the internal structure of trained networks could yield important contributions to the field of music cognition

Infinite Music Adam Harper, 2011-11-16 In the last few decades new technologies have brought composers and listeners to the brink of an era of limitless musical possibility They stand before a vast ocean of creative potential in which any sounds imaginable can be synthesised and pieced together into radical new styles and forms of music making But are musicians taking advantage of this potential How could we go about creating and listening to new music and why should we Bringing the ideas of twentieth century avant garde composers Arnold Schoenberg and John Cage to their ultimate conclusion *Infinite Music* proposes a system for imagining music based on its capacity for variation redefining musical modernism and music itself in the process It reveals the restrictive categories traditionally imposed on music making replaces them with a new vocabulary and offers new approaches to organising musical creativity By detailing not just how music is composed but crucially how it is perceived *Infinite Music* maps the future of music and the many paths towards it

[Alien Listening](#) Daniel K. L. Chua, Alexander Rehding, 2021-09-14 An examination of NASA's Golden Record that offers new perspectives and theories on how music can be analyzed listened to and thought about by aliens and humans alike In 1977 NASA shot a mixtape into outer space The Golden Record aboard the Voyager spacecrafts contained world music and sounds of Earth to represent humanity to any extraterrestrial civilizations To date the Golden Record is the only human made object to have left the solar system *Alien Listening* asks the big questions that the Golden Record raises Can music live up to its reputation as the universal language in communications with the unknown How do we fit all of human culture into a time capsule that will barrel through space for tens of thousands of years And last but not least Do aliens have ears The stakes could hardly be greater Around the extreme scenario of the Golden Record Chua and Rehding develop a thought provoking philosophically heterodox and often humorous *Intergalactic Music Theory of Everything* a string theory of communication an object oriented ontology of sound and a Penelopean model woven together from strands of music and media theory The significance of this exomusicology like that of the Golden Record

ultimately takes us back to Earth and its denizens By confronting the vast temporal and spatial distances the Golden Record traverses the authors take listeners out of their comfort zone and offer new perspectives in which music can be analyzed listened to and thought about by aliens and humans alike *The Boundaries of Music and Poetry* August Wilhelm Ambros,1893 **Dictionary of Music and Musicians** George Grove,1898 **Dictionary of Music and Musicians** Sir George Grove,John Alexander Fuller-Maitland,1895 **Grove's Dictionary of Music and Musicians** George Grove,1928 **A Biographical Dictionary of Old English Music** Jeffrey Pulver,1927 **A Dictionary of Music and Musicians** George Grove,1883 **Yearbook of the Music Educators National Conference** Music Educators National Conference (U.S.),1929 **A Complete History of Music, for Schools, Clubs, and Private Readings** Winton James Baltzell,1905 **A Complete History of Music for Schools, Clubs, and Private Reading** Winton James Baltzell,1908 Music Criticisms, 1846-99 Eduard Hanslick,1903 **Music Clubs Magazine** ,1950 *Music News* ,1927 *A Dictionary of Music and Musicians (A.D. 1450-1880) by Eminent Writers, English and Foreign* George Grove,1883 **A Dictionary of Music and Musicians (A.D. 1450-1889) by Eminent Writers, English and Foreign** ,1898 *A Dictionary of Music and Musicians (A.D. 1450-1880) by Eminent Writers, English and Foreign* John Alexander Fuller-Maitland,Adela H.
