The Nature of Scientific Innovation, Volume I David Dent, 2024-12-01 Innovation is a major driver of social, economic and environmental change and is researched extensively by academics from disciplines as diverse as business, engineering, economics, sociology and psychology. On the whole each discipline pursues its own pathway to understanding without an interdisciplinary framework that links diverse research outputs. This partite structure creates a remove from the practical realities of entrepreneurship and the innovators who operate and perceive innovation in its entirety. This book delivers insights and creates a different framework, one that includes terminologies and typologies, greater understanding of paradigmatic influences in science, needs vs wants and demand, impact and value of knowledge.

Understanding Development Economics Adam Fforde,2014-01-03
