Foliated Bundles and Characteristic Classes Franz W. Kamber, Philippe Tondeur, 2006-11-14 **The Energy Access Dividend in Honduras and Haiti** Natacha C. Marzolf, Emily L. Pakhtigian, Eric Burton, Marc Jeuland, Subhrendu K. Pattanayak, Jonathan Phillips, Christine Eibs Singer, Hadley Taylor, Michelle Carvalho Metanias Hallack, Javier Cuervo, Carlos Jacome, 2019-12-02 Global patterns in electricity access show uneven progress towards universal electrification SDG 7 Nearly 90 percent of households lacking basic electricity access are rural Although reaching rural households through grid connections continues to present challenges to expanding access alternative electricity solutions including solar home systems and microgrids are allowing for more rapid expansion of access in rural and peri urban areas This report attempts to quantify and monetize benefits generated through accelerated electricity access and builds on an existing framework for measuring the dividends of electrification the Energy Access Dividend for Haiti and Honduras two countries that represent different electricity access situations in Latin America *Model-Based Engineering with AADL* Peter H. Feiler, David P. Gluch, 2012-09-25 Conventional build then test practices are making today's embedded software reliant systems unaffordable to build In response more than thirty leading industrial organizations have joined SAE formerly the Society of Automotive Engineers to define the SAE Architecture Analysis Design Language AADL AS 5506 Standard a rigorous and extensible foundation for model based engineering analysis practices that encompass software system design integration and assurance Using AADL you can conduct lightweight and rigorous analyses of critical real time factors such as performance dependability security and data integrity You can integrate additional established and custom analysis specification techniques into your engineering environment developing a fully unified architecture model that makes it easier to build reliable systems that meet customer expectations Model Based Engineering with AADL is the first guide to using this new international standard to optimize your development processes Coauthored by Peter H Feiler the standard's author and technical lead this introductory reference and tutorial is ideal for self directed learning or classroom instruction and is an excellent reference for practitioners including architects developers integrators validators certifiers first level technical leaders and project managers Packed with real world examples it introduces all aspects of the AADL notation as part of an architecture centric model based engineering approach to discovering embedded software systems problems earlier when they cost less to solve Throughout the authors compare AADL to other modeling notations and approaches while presenting the language via a complete case study the development and analysis of a realistic example system through repeated refinement and analysis Part One introduces both the AADL language and core Model Based Engineering MBE practices explaining basic software systems modeling and analysis in the context of an example system and offering practical guidelines for effectively applying AADL Part Two describes the characteristics of each AADL element including their representations applicability and constraints The Appendix includes comprehensive listings of AADL language elements

properties incorporated in the AADL standard and a description of the book's example system

Quantum Field Theory and Noncommutative Geometry Ursula Carow-Watamura, Yoshiaki Maeda, 2005-02-21 This volume reflects the growing collaboration between mathematicians and theoretical physicists to treat the foundations of quantum field theory using the mathematical tools of q deformed algebras and noncommutative differential geometry A particular challenge is posed by gravity which probably necessitates extension of these methods to geometries with minimum length and therefore quantization of space This volume builds on the lectures and talks that have been given at a recent meeting on Quantum Field Theory and Noncommutative Geometry A considerable effort has been invested in making the contributions accessible to a wider community of readers so this volume will not only benefit researchers in the field but also postgraduate students and scientists from related areas wishing to become better acquainted with this field

IBM z/OS V1R13 Communications Server TCP/IP Implementation: Volume 2 Standard Applications Mike Ebbers, Rama Ayyar, Octavio L. Ferreira, Yohko Ojima, Gilson Cesar de Oliveira, Mike Riches, Maulide Xavier, IBM Redbooks, 2011-12-27 For more than 40 years IBM mainframes have supported an extraordinary portion of the world's computing work providing centralized corporate databases and mission critical enterprise wide applications The IBM System z the latest generation of the IBM distinguished family of mainframe systems has come a long way from its IBM System 360 heritage Likewise its IBM z OS operating system is far superior to its predecessors providing among many other capabilities world class state of the art

support for the TCP/IP Internet protocol suite. TCP/IP is a large and evolving collection of communication protocols managed by the Internet Engineering Task Force (IETF), an open volunteer organization. Because of its openness, the TCP/IP protocol suite has become the foundation for the set of technologies that form the basis of the Internet. The convergence of IBM mainframe capabilities with Internet technology, connectivity, and standards, particularly TCP/IP, is dramatically changing the face of information technology and driving requirements for ever more secure, scalable, and highly available mainframe TCP/IP implementations. The IBM z/OS Communications Server TCP/IP Implementation series provides understandable, step-by-step guidance about how to enable the most commonly used and important functions of z/OS Communications Server TCP/IP. This IBM Redbooks publication provides useful implementation scenarios and configuration recommendations for many of the TCP/IP standard applications that z/OS Communications Server supports. For more specific information about z/OS Communications Server standard applications, high availability, and security, see the other volumes in the series: IBM z/OS V1R13 Communications Server TCP/IP Implementation Volume 1: Base Functions, Connectivity, and Routing (SG24-7996); IBM z/OS V1R13 Communications Server TCP/IP Implementation Volume 3: High Availability, Scalability, and Performance (SG24-7998); IBM z/OS V1R13 Communications Server TCP/IP Implementation Volume 4: Security and Policy-Based Networking (SG24-7999). For comprehensive descriptions of the individual parameters for setting up and using the functions that we describe in this book, along with step-by-step checklists and supporting examples, see the following publications: z/OS Communications Server IP Configuration Guide (SC31-8775); z/OS Communications Server IP Configuration Reference (SC31-8776); z/OS Communications Server IP User's Guide and Commands (SC31-8780). This book does not duplicate the information in those publications. Instead, it complements them with practical implementation scenarios that can be useful in your environment. To determine at what level a specific function was introduced, see z/OS Communications Server New Function Summary (GC31-8771). For complete details, we encourage you to review the documents that are listed in the additional resources section at the end of each chapter.

Geometry of Foliations Philippe Tondeur, 2012-12-06. The topics in this survey volume concern research done on the differential geometry of foliations over the last few years. After a discussion of the basic concepts in the theory of foliations in the first four chapters, the subject is narrowed down to Riemannian foliations on closed manifolds, beginning with Chapter 5. Following the discussion of the special case of flows in Chapter 6, Chapters 7 and 8 are devoted to Hodge theory for the transversal Laplacian and applications of the heat equation method to Riemannian foliations. Chapter 9 on Lie foliations is a preparation for the statement of Molino's Structure Theorem for Riemannian foliations in Chapter 10. Some aspects of the spectral theory for Riemannian foliations are discussed in Chapter 11. Connes' point of view of foliations as examples of noncommutative spaces is briefly described in Chapter 12. Chapter 13 applies ideas of Riemannian foliation theory to an infinite-dimensional context. Aside from the list of references on Riemannian foliations, items on this list are referred to in the text by we have included several appendices as follows: Appendix A is a list of books and surveys on

particular aspects of foliations Appendix B is a list of proceedings of conferences and symposia devoted partially or entirely to foliations Appendix C is a bibliography on foliations which attempts to be a reasonably complete list of papers and preprints on the subject of foliations up to 1995 and contains approximately 2500 titles

Basic Connections Kakuko Shoji,2012-08-03 Basic Connections provides basic information about expressions and usages that facilitate the flow of ideas and thoughts in written and spoken Japanese It explains how words and phrases dovetail how clauses pair up with other clauses how sentences come together to create harmonious paragraphs Since this is a book about the basics it starts with the fundamentals explaining first the two types of Japanese sentence A is B and A does B Then it proceeds to the problem of the modifier and the modified a matter of which is which Wa and ga naturally get considerable play after all it is downright impossible to speak properly without them There is also a discussion of linking nouns and noun phrases not to speak of verbs and verb phrases The book goes on to devote a whole chapter to common mistakes and troublesome usages The final chapter attempts to pin down some particularly slippery locutions such as toshite imada ni sore kara whoppers like Sentence A te sae inakereba Sentence B and many more Any beginning or intermediate student having spent a certain amount of time and energy studying this book will be able to speak and read Japanese in a much more coherent fashion
