**Instructor's Manual and Testbank** Evans, Annabel Ness, Soetaert, Lynn, 1989 *Basic Statistics for the Behavioral Sciences* Gary Heiman, 2010-01-26 BASIC STATISTICS FOR THE BEHAVIORAL SCIENCES demystifies and fully explains statistics without leaving out relevant topics or simply presenting formulas in a format that is non-threatening and inviting to students. The author's clear, patiently crafted explanations with an occasional touch of humor teach students not only how to compute an answer but also why they should perform the procedure or what their answer reveals about the data. The book achieves several objectives: it presents a conceptual, intuitive approach; presents statistics within an understandable research context; deals directly and positively with student weaknesses in mathematics and introduces new terms and concepts in an integrated way. The result is a text that students can learn from as well as enjoy. The focus of this work is on teaching students with little mathematical background how to select and conduct appropriate statistical tests to answer research questions or analyze student performance as well as on helping students become good consumers of research through the understanding of statistical methods. *Fundamental Statistics for Behavioral Sciences* Robert B. McCall, 1998. This text takes a traditional approach to teaching the basic statistical concepts and methods used in behavioral research. McCall emphasizes building an understanding of the logic of statistics rather than stressing the mechanics. Similarly, the data for computational problems has been kept simple so students can focus on the rationale and outcome of techniques instead of the calculations themselves. Behavioral research issues are built into the problems and exercises.
