Citizenship, Migration and Social Rights

Beate Althammer, 2023-08-25 The tensions between European conceptions of the welfare state and transnational migration have caused heated political public and academic debates over the last decades Historiography however has not yet explored in depth how European societies struggled with this dilemma filled relationship in the formative phases of modern welfare states from the late nineteenth century to the post war era The present volume contributes to filling this gap and thus to putting a highly topical issue into historical perspective The focus is on Europe but with a wide geographic scope that reaches also across the Atlantic Following an introductory chapter eleven case studies deal with four themes The first part explores the agency of migrants in local level administrative and judicial procedures that controlled practical access to formal rights The second section investigates special regulations developed for seasonal labour migrants employed mainly in agriculture The third part looks at the role of urban social policies in attracting integrating but also excluding both domestic and foreign migrants The final section addresses the gradual globalisation of migrants social rights through international conventions The book will be of interest not only to historians of welfare migration and citizenship but also to social scientists as well as to graduate students in these fields

Protesting Citizenship: Migrant Activisms Imogen Tyler, 2017-07-05 What does it mean to state No One is Illegal This rallying call is what unifies migrant protests against exclusionary border regimes around the world bringing migrants citizens legal and illegal people onto the streets in ever greater numbers Indeed the last decade has witnessed an explosion of immigrant protests political

mobilizations by irregular migrants and pro migrant activists This edited collection aims to contribute to the growing body of scholarship on migrant resistance movements and to consider the implications of these struggles for critical understandings of citizenship and borders It offers a rich series of theoretical and political interventions which together explore the tensions between integrationist and autonomous approaches and between migrant and activist strategies of invisibility and visibility By bringing immigrant protests to the heart of debates about citizenship it also extends discussions about the limits and the possibilities of citizenship as the material and conceptual horizon of critical social analysis political participation and democracy today This book was published as a special issue of Citizenship Studies *Citizenship, Immigration and Ethnic Groups in Canada* Canada. Department of Citizenship and Immigration. Economic and Social Research Division,1962

Handbook of Citizenship and Migration Marco Giugni, Maria Grasso, 2021-06-25 Taking an integrated approach this unique Handbook places the terms citizenship and migration on an equal footing examining how they are related to each other both conceptually and empirically *The Practice of Citizenship in Home, School, Business and Community* Roscoe Lewis Ashley, 1922 **Citizenship and Immigration - Borders, Migration and Political Membership in a Global Age** Ann E. Cudd, Win-chiat Lee, 2016-08-10 This work offers a timely philosophical analysis of interrelated normative questions concerning immigration and citizenship in relation to the global context of multiple nation states In it philosophers and scholars from the social sciences address both fundamental questions in moral and political philosophy as well as specific issues concerning policy Topics covered in this volume include the concept and the role of citizenship the equal rights and representation of citizens general moral frameworks for addressing immigration issues the duty to obey immigration law the use of ethnic cultural or linguistic criteria for selective immigration domestic violence as grounds for political asylum and our duty to refugees in general The urgency of the need to discuss these matters is clear Several humanitarian crises involving human migration across national boundaries stemming from war economic devastations gang violence and violence in ethnic or religious conflicts have unfolded Political debates concerning immigration and immigrant communities are continuing in many countries especially during election years While there have always been migrating human beings they raise distinctive issues in the modern era because of the political context under which the migrations take place namely that of a system of sovereign nation states with rights to control their borders and determine their memberships This collection provides readers the opportunity to parse these complex issues with the help of diverse philosophical moral and political perspectives

Citizenship and Migration in the Era of Globalization Markus Pohlmann, Jonghoe Yang, Jong-Hee Lee, 2013-03-15 In an age of globalization there is frequent migration across national borders resulting in a reconsideration of the notion practice and social institution of national citizenship Addressing this phenomenon the book focuses on the exchange between and responses of Korea and Germany In particular the book deals extensively with citizenship in Korea where the concept of citizenship is young and thus the study of citizenship is relatively scarce This book may be the first of its kind bringing

together eminent Korean and German scholars to analyse various aspects of citizenship in Korea It is hoped that it will contribute to scholarship in the fields of citizenship and migration and to an understanding of the flow of people and ideas between Asia and Europe

The Seamen's Journal ,1927 **The Police Power, Public Policy and Constitutional Rights** Ernst Freund,1904 **Citizenship and Immigration** Christian Joppke,2013-05-06 This incisive book provides a succinct overview of the new academic field of citizenship and immigration as well as presenting a fresh and original argument about changing citizenship in our contemporary human rights era Instead of being nationally resilient or in postnational decline citizenship in Western states has continued to evolve converging on a liberal model of inclusive citizenship with diminished rights implications and increasingly universalistic identities This convergence is demonstrated through a sustained comparison of developments in North America Western Europe and Australia Topics covered in the book include recent trends in nationality laws what ethnic diversity does to the welfare state the decline of multiculturalism accompanied by the continuing rise of antidiscrimination policies and the new state campaigns to upgrade citizenship in the post 2001 period Sophisticated and informative and written in a lively and accessible style this book will appeal to upper level students and scholars in sociology political science and immigration and citizenship studies
