City In War:

War and the City Gregory J. Ashworth, 2002-09-26 Cities have evolved from small urban systems designed to withstand attack to the modern demands of internal violence This book analyses the role of the cities in war and the effects of war on cities

Cities at War Mary Kaldor, Saskia Sassen, 2020-03-31 Warfare in the twenty first century goes well beyond conventional armies and nation states In a world of diffuse conflicts taking place across sprawling cities war has become fragmented and uneven to match its settings Yet the analysis of failed states civil war and state building rarely considers the city rather than the country as the terrain of battle In *Cities at War* Mary Kaldor and Saskia Sassen assemble an international team of scholars to examine cities as sites of contemporary warfare and insecurity Reflecting Kaldor's expertise on security cultures and Sassen's perspective on cities and their geographies they develop new insight into how cities and their residents encounter instability and conflict as well as the ways in which urban forms provide possibilities for countering violence Through a series of case studies of cities including Baghdad Bogot Ciudad Juarez Kabul and Karachi the book reveals the unequal distribution of insecurity as well as how urban capabilities might offer resistance and hope Through analyses of how contemporary forms of identity inequality and segregation interact with the built environment *Cities at War* explains why and how political violence has become increasingly urbanized It also points toward the capacity of the city to shape a different kind of urban subjectivity that can serve as a foundation for a more peaceful and equitable future

War and the City Sara Fregonese, 2019-11-14 *War and the City* examines the geopolitical significance of the Lebanese Civil War through a micro level exploration of how the urban landscape of Beirut was transformed by the conflict Focusing on the initial phase of the war in 1975 and 1976 the volume also draws significant parallels with more recent occurrences of internecine conflict and with the historical legacies of Lebanon's colonial past While most scholarship has thus far focused on post war reconstruction of the city the initial process of destruction has been neglected This volume thus moves away from formal macro level geopolitical analysis to propose instead an exploration of the urban nature of conflict through its spaces infrastructures bodies and materialities The book utilizes urban viewpoints in order to highlight the nature of sovereignty in Lebanon and how it is inscribed on the urban landscape *War and the City* presents a view of geopolitics as not only shaping narratives of international relations but as crucially reshaping the space of cities

Current History, 1918 *The War of the Rebellion* United States. War Department, 1886 Official records produced by the armies of the United States and the Confederacy and the executive branches of their respective governments concerning the military operations of the Civil War and prisoners of war or prisoners of state Also annual reports of military departments calls for troops correspondence between national and state governments correspondence between Union and Confederate officials The final volume includes a synopsis general index special index for various military divisions and background information on how these documents were collected and published Accompanied by an atlas

In the Nature of Cities Nik Heynen, Maria Kaika, Erik Swyngedouw, 2006-03-23 The

social and material production of urban nature has recently emerged as an important area in urban studies human environmental interactions and social studies This has been prompted by the recognition that the material conditions that comprise urban environments are not independent from social political and economic processes or from the cultural construction of what constitutes the urban or the natural Through both theoretical and empirical analysis this groundbreaking collection offers an integrated and relational approach to untangling the interconnected processes involved in forming urban landscapes The essays in this book attest that the re entry of the ecological agenda into urban theory is vital both in terms of understanding contemporary urbanization processes and of engaging in a meaningful environmental politics They debate the central themes of whose nature is or becomes urbanized and the uneven power relations through which this socio metabolic transformation takes place Including urban case studies international research and contributions from prominent urban scholars this volume will enable students scholars and researchers of geographical environmental and urban studies to better understand how interrelated everyday economic political and cultural processes form and transform urban environments
