Kayden, The New York City Department of City Planning, The Municipal Art Society of New York, 2000-11-10 Hailed by the Wall Street Journal as a juicy little time bomb of a book Privately Owned Public Space The New York City Experience examines for the first time New York City's 39 year mixed experience with the production of more than 500 plazas parks and atriums located on private property yet by law accessible to and usable by the public Until now comprehensive systematic knowledge about this vast collection of public spaces has not existed either for experts or members of the public To remedy this gap Harvard University professor Jerold S Kayden The New York City Department of City Planning and The Municipal Art Society of New York have joined forces to research and write Privately Owned Public Space The New York City Experience Through words photographs scaled site plans maps and analysis of newly assembled data they examine history law design and use of the city's privately owned public spaces Each of the more than 500 spaces is individually discussed to provide far reaching comparative information about this unique category of public space In reading this book designers planners lawyers and academics will gain greater understanding about the possibilities and problems inherent in the design management and enforcement of privately owned public space Public officials private owners and civic group representatives will learn more about their roles in ensuring public access and vitality of such spaces Individuals will discover where New York City's public spaces are located and what amenities they offer Everyone will comprehend more completely the contribution that privately owned public space can make toward open and attractive cities in which all individuals have access to a diversity of public places

Green City Spaces Chris van Uffelen, 2013 Green areas of all kinds have gained

significance for contemporary urban planning In addition to the importance for the structure and appearance of urban spaces these areas have very different social ecological and economic functions For instance they can serve as relaxation and communication rooms or as habitats for flora and fauna they can have an extremely positive influence on the micro climate not to mention the increasing attention they receive from the real estate business as a factor in site evaluation This volume presents a broad spectrum of green areas from around the world like urban parks green facades public gardens and green city squares The interplay of international trends regional characteristics and local traditions is especially interesting The selection of projects shows the various tendencies of this discipline at the junction of landscape architecture and urban planning

Temporary Urban Spaces Florian Haydn,2006 A fresh approach has emerged to questions of town planning and the use of public and private space where the focus is no longer on the master plan the strategy and the making of long term arrangements This volume brings together articles and essays by renowned individual authors who approach the subject from a theoretical perspective
