CIW Security Professional Certification Bible Mandy Andress, Phil Cox, Ed Tittel, 2001-10-15 CIW Security Professional Certification Bible follows Prosoft Training's curriculum and objectives for the CIW Security exam while providing information to help security professionals on the job. It details areas such as encryption technologies, types of incidents and attacks, system and network security, TCP/IP, managing the network boundary, implementing firewalls, intrusion detection and prevention. This book also covers securing the operating system, securing user accounts and file resources, assessing risk, auditing, scanning, and discovery, defeating network penetration, creating security control procedures. Covers Exam 1D0 470

Computer Security John S. Potts, 2002 We live in a wired society with computers containing and passing around vital information on both personal and public matters. Keeping this data safe is of paramount concern to all. Yet not a day seems able to pass without some new threat to our computers. Unfortunately, the march of technology has given us the benefits of computers and electronic tools while also opening us to unforeseen dangers. Identity theft, electronic spying, and the like are now standard worries. In the effort to defend both personal privacy and crucial databases, computer security has become a key industry. A vast array of companies devoted to defending computers from hackers and viruses have cropped up. Research and academic institutions devote a considerable amount of time and effort to the study of information systems and computer security. Anyone with access to a computer needs to be aware of the developing trends and growth of computer security. To that end, this book presents a comprehensive and carefully selected bibliography of the literature most relevant to understanding computer security. Following the bibliography section, continued access is provided via author title and subject indexes. With such a format, this book serves as an important guide and reference tool in the defence of our computerised culture.
