Algebraic Patching Moshe Jarden, 2011-01-03 Assuming only basic algebra and Galois theory the book develops the method of algebraic patching to realize finite groups and more generally to solve finite split embedding problems over fields. The method succeeds over rational function fields of one variable over ample fields. Among others it leads to the solution of two central results in Field Arithmetic: a) The absolute Galois group of a countable Hilbertian perfect field is free on countably many generators. b) The absolute Galois group of a function field of one variable over an algebraically closed field C is free of rank equal to the cardinality of C .

Abelian Varieties and Number Theory Moshe Jarden, Tony Shaska, 2021-05-03 This book is a collection of articles on Abelian varieties and number theory dedicated to Gerhard Frey's 75th birthday. It contains original articles by experts in the area of arithmetic and algebraic geometry. The articles cover topics on Abelian varieties and finitely generated Galois groups, ranks of Abelian varieties and Mordell Lang conjecture, Tate-Shafarevich group and isogeny volcanoes, endomorphisms of superelliptic Jacobians, obstructions to local-global principles over semi-global fields, Drinfeld modular varieties, representations of étale fundamental groups and specialization of algebraic cycles, Deuring's theory of constant reductions, etc. The book will be a valuable resource to graduate students and experts working on Abelian varieties and related areas.

Computational Intelligence De-Shuang Huang, George William Irwin, 2006-08-04 This is the proceedings of the International Conference on Intelligent Computing ICIC 2006 Kunming China August 2006.
