Lüth,Horst König,2013-12-19 At the present time we are witnessing a period of vigorous growth in the iron and steel
industries of the older industrialised countries Looking farther afield we find that iron and steel indus tries are also being
established in countries that have in recent years gained their independence countries that hitherto had no iron and
steelworks at all or none of any great significance This situation produces a certain diversity in the planning and building of
iron and steelworks In the first case high capacity iron and steelworks are built on the basis of conventional tried and tested
processes or existing plant is extended in the second case considerably smaller works have to be planned and very often
newer or unorthodox metallurgical processes must be used to cater for the specific raw materials available to the country in
question Following this change in the tasks of the planning engineer and in view of the new iron and steelmaking methods
developed in the meantime the decision was taken to revise and enlarge F LUTH s Planung und Bau von H iittenwerken the
