**Toproping** Bob Gaines,2020-10-01 Toproping is rock climbing with the

rope anchored at the top of the climb as opposed to lead climbing where a climber places protection as he or she goes. Having a top anchor lessens the potential distance of a fall and creates a more controlled situation in which to hone your climbing technique. Toproping is at the heart of learning to climb and being able to safely set up and manage top rope situations is a critical component in the development of any climber. While it seems simple on the surface, top ropes must be rigged and configured properly in accordance with sound safety principles and that's where this book comes in. *Rock Climbing in a Weekend* Malcolm Creasey, 2004. Contains a full color illustrated guide to safe rock climbing and shows proper positioning and techniques, common climbing mistakes and safety tips for both indoor and outdoor environments.
